ANNUAL REPORT

of the
STATE SUPERINTENDENT
OF PUBLIC INSTRUCTION
UTAH STATE OFFICE OF EDUCATION

1985-1986
UTAH PUBLIC SCHOOL SYSTEM

THE STATE OF UTAH
OFFICE OF THE STATE SUPERINTENDENT OF PUBLIC INSTRUCTION

Salt Lake City, Utah 84111

January, 1987

Honorable
Norman H. Bangerter
Governor, State of Utah
State Capitol
Salt Lake City, Utah 84114

Dear Governor Bangerter,

Section 53-3-5 of the Utah Code requires me to present to you an annual report following the conclusion of each fiscal year. This report covers the period of July 1, 1985 to June 30, 1986.

I appreciate the opportunity of serving the people of this great state in the field of public education.

Sincerely yours,

Bernarr S. Furse
State Superintendent
of Public Instruction

SUPERINTENDENTS
UTAH TERRITORIAL SCHOOLS

Elias Smith, Superintendent of Primary Schools, 1851-1856.
William Willis, Superintendent of Common Schools, 1856-1862.
Robert L. Campbell, Superintendent of Common Schools, 1862-1874.
O. H. Riggs, Superintendent of District Schools, 1874-1877.
John Taylor, Superintendent of District Schools, 1877-1881.
L. John Nuttall, Superintendent of District Schools, 1881-1887.
P. L. Williams, Commissioner of Schools, 1887-1889.
Jacob S. Boreman, Commissioner of Schools, 1889-1894.
T. B. Lewis, Commissioner of Schools, 1894-1896.

UTAH STATE SUPERINTENDENTS

John R. Park, State Superintendent of Public Instruction, January, 1896 to September, 1900.

Mrs. Emma J. McVicker, State Superintendent of Public Instruction, October, 1900 to January, 1901.

A. C. Nelson, State Superintendent of Public Instruction, January, 1901 to December, 1913.

A. C. Matheson, State Superintendent of Public Instruction, January, 1913 to December, 1915.

E. G. Gowan, State Superintendent of Public Instruction, January, 1915 to July, 1919.

G. N. Child, State Superintendent of Public Instruction, July, 1919 to June, 1920.

George Thomas, State Superintendent of Public Instruction, January, 1921 to July, 1921.

C. N. Jensen, State Superintendent of Public Instruction, July, 1921 to January, 1933.

Charles H. Skidmore, State Superintendent of Public Instruction, January, 1933 to January, 1945.

E. Allen Bateman, State Superintendent of Public Instruction, January, 1945 to October, 1960.

Wilburn N. Ball, Acting State Superintendent of Public Instruction, October, 1960 to January, 1961; State Superintendent of Public Instruction, January, 1961 to April, 1962.

Marsden B. Stokes, Acting State Superintendent of Public Instruction, April, 1962 to August, 1962.

Marion G. Merkley, State Superintendent of Public Instruction, August, 1962 to April, 1963.

Marsden B. Stokes, Acting State Superintendent of Public Instruction, April, 1963 to June, 1963.

T. H. Bell, State Superintendent of Public Instruction, June, 1963 to April, 1970.

Walter D. Talbot, State Superintendent of Public Instruction, April, 1970 to June, 1982.

Vaughn L. Hall, Acting State Superintendent of Public Instruction, April, 1982 to July, 1982.

G. Leland Burninghan, State Superintendent of Public Instruction, July, 1982 to April, 1985.

Bernarr S. Furse, State Superintendent of Public Instruction, April, 1985 to December, 1986.

James R. Moss, State Superintendent of Public Instruction, December, 1986, Incumbent.

PART I
GENERAL PROBLEMS AND RECOMMENDATIONS

BERNARR S. FURSE
State Superintendent of
Public Instruction

INTRODUCTION

Section 53-3-5 of the Utah Law requires the State Superintendent of Public Instruction to present annually to the Governor a report of the administration of the public school system. The report is to be presented following the close of each fiscal year and preceding each session of the Utah State Legislature. It offers specific information describing plans, problems, and accomplishments of the public education system, and presents statistical data essential to an understanding of the system.

Fiscal year 1986 was marked with a major change in the state's economy. Initial long-range revenue projections in the late fall of 1985 indicated the possibility of major revenue shortfalls for state government, continuing on through 1991. The state was challenged to take costly emergency measures to cope with the rising waters of the Great Salt Lake, which for the second year threatened the railroad causeway across the lake and Interstate Highway 80 along the southern rim of the lake. Both had been raised to keep above the rising waters. The Legislature approved funds to cut a breech in the causeway on the west to allow the higher waters on the south of the causeway to flow into the northern arm, thus relieving some of the pressure on the railroad and Interstate 80. Even while preparing for the costly effort to pump lake water into a holding pond in West Desert, the 1986 Legislature had to utilize about thirty million dollars earmarked for flood

relief to fund state government, including education.

As a consequence of the downturn in the economy, and the need for state funds to cope with flooding problems, districts were required to slightly reduce expenditures in the closing months of the 1985-86 school year.

Utah's burgeoning enrollment continued to challenge the school system and the state's resources. In the spring of 1985, 19,200 students graduated from the public schools, but 38,730 students enrolled in kindergarten for the opening of school the next fall. The 1984 October fall enrollment was 390,141 students, and the 1985 fall enrollment was 403,305, for an increase of 13,164 students. The rate of growth was decreasing with projections of 13,500 for the 1986-87 school year as fewer students moved into the state with a slight net outmigration thought to be due to the stagnation of the economy.

CONTINUING THE REFORM...

In 1985, the Legislature increased school appropriations by $88,561,272. An increase of $14,910,093 was provided as the second installment to the schools' career ladder program, and an additional $1,500,000 for developing and implementing plans for greater use of school facilities through year-round school and extended day plans. Outcome-based education received an increase as legislators endorsed programs to further this philosophy, primarily in the rural schools of the state.

CAREER LADDERS

Probably the most significant reform legislation in the last decade to improve Utah schools and to enhance teaching was the state's career ladder program for the public schools. It maximizes education's most valuable resource by improving and rewarding teaching excellence, productivity and student achievement. Utah's approach allowed each district to develop its own plan with no less than 10 per cent of a district's allocation to be used as a bonus for outstanding performance; up to 50 per cent of the funds to be used for additional contract days for teachers; and the balance of a district's entitlement to be used for career ladder steps for master teaching roles and assignments. While relying on local school career ladder plan development, state office personnel have been very successful in helping districts adopt components of plans found to be successful in other districts. Career ladder programs were well received by over 72 percent of teachers in one sampling.

CORE CURRICULUM

Utah's new core curriculum underwent a field trial during the 1985-86 school year. The purpose of the field trial was: (1) to further assess the validity of the core standards required of all students; (2) to determine the appropriateness of core standards by grade level; and (3) to determine whether or not most students could master the standards. All school districts were involved in giving input and in

refining the Core Curriculum standards. Progress through FY 1986 seems to point very positively to the successful refinement and acceptance of the Core Curriculum by the districts of the state. Refinements are expected to be completed by FY 1987 for full adoption by the State Board of Education.

ASSESSMENT OF THE CORE

The State Board of Education initiated a program to determine the success of Utah's new Core Curriculum. Success is to be determined by an appropriate student assessment program. Student assessment will bring accountability to instruction and will be used to verify mastery of Core standards by students. Only initial work will be completed in FY 1986, and a multi-year effort in cooperation with other states is to be expected. The Council of Chief State School Officers, the national organization of state school superintendents, has endorsed a joint effort in measurement. Utah's program will be the development of test items specifically tailored to the measurement of Utah's core standards. The work will complement the national thrust.

PRINCIPALS ACADEMY

The Principals Academy, established by the State Board of Education in September, 1984, has been an instant success with both superintendents and principals. It focuses on the Board goal to improve the effectiveness of school administrators as instructional leaders through retraining opportunities for practicing principals.

The Academy objectives are: (1) to strengthen the role of the principal as an instructional leader; (2) to provide inservice for continued skill development of principals; (3) to build a collegial network of support among principals; and (4) to serve as a resource center for all principals in the state in the dissemination of ideas and practices.

In order to meet these objectives, the Academy provided the following training programs: direct inservice training for specific groups of principals upon request; inservice seminars open to all principals on a variety of topics relevant to the needs of school principals; and a Fellows Program for a select group of principals which involved them in an intensive program of inservice through the school year.

TEACHER PREPARATION

Improved teacher preparation requires cooperation among Utah school districts, the State Office of Education, and institutions of higher education. A pilot program was initiated to extend teacher preparation reform beyond the customary preparation programs of higher education and into local school districts. The pilot program focused on two major areas of reform. First, it enabled increased cooperation between school districts and colleges and universities in developing teacher preparation programs. Second, it allowed intensified clinical experiences for prospective teachers and increased supervision of novice teachers. The pilot program included intensive supervision of novice teachers and the selection of exceptional teach-

ers in participating districts to work with the cooperating college or university in its teacher preparation program and to provide increased supervision of beginning teachers.

PRODUCTIVITY

For the past four years, a number of productivity models have been developed, implemented, and replicated in many of Utah's schools. Productivity models include utilizing alternative staffing patterns, outcome-based education methods, extended day/extended year scheduling options, and new and effective uses of technology for instruction and school management. The purpose of the productivity program is to develop more cost-effective educational models wherein teachers work with more students with no loss in student performance. A special report was issued by the State Board of Education demonstrating major savings had occurred as a result of the implementation of productivity models.

YEAR-ROUND SCHOOLS

The 1985 Legislature appropriated $1.5 million for the development of year-round programs in elementary schools. Adoption of year-round school programs becomes increasingly critical to maximize the use of existing school facilities as school revenues become more limited. The Utah program allows more students to be served for the same amount of money with improved educational results.

Twenty-one of Utah's 40 school districts have been involved in exploring the year-round programs. Several have year-round schools in operation. Others are in the planning or developmental stage. It is anticipated that up to 50 schools will opt for year-round programs within the next year. This is a dramatic change from four years ago when no Utah school system had seriously attempted to adopt year-round schools. Variations of a double session or an overlapping session model were first used in Utah at the Club Heights Elementary School in Weber County. Now the so-called 'Club Heights Model' is being tried in several elementary schools throughout the state.

INSTRUCTIONAL TECHNOLOGY

Many of Utah's productivity efforts and models required the use of computers and other technological hardware. Instructional technology required districts to purchase equipment to implement proven productivity programs such as instructional management systems, computer assisted instruction, accelerated foreign language instruction via satellite, and the 'WANDAH' writing project. In one system, computers, a satellite, and a new approach to language instruction are helping to expand the curriculum for many students. A collaborative effort by International Business Machines, Bonneville International Corporation, and the Utah State Office of Education used a new teaching methodology, satellite delivery, and computer reinforcement to create a Spanish course called Distance Accelerated Learning Program (DALP).

Acquisition of computers and other technological equipment is also considered important if schools are to meet society's new demands for computer literacy. Computers are appearing in homes and workplaces in increasing numbers. Failure to achieve computer literacy would seriously undermine a student's ability in school, as well as in the world of work.

RICHARD GOMEZ
Administrator for
Educational Equity

EDUCATIONAL EQUITY COORDINATION

Education is a principal means of increasing and developing the worth of an individual. An appropriate education for all persons is both a fundamental axiom of a democratic way of life and an effective instrument of social and economic progress. Educational Equity is far too important a matter to be left to chance, hopes, or politics. The induction of all students into a larger U.S. society, and their preparation as effective, productive citizens is vital.

Through the Educational Equity Unit, the Utah State Office of Education assumes a leadership role in the educational thrust throughout the Utah school system to provide equitable, quality education to each and every student. It works to insure that no person on the basis of race, color, national origin, sex, religion, age, or handicap, is denied the benefits of equity for a quality education.

The Educational Equity Unit provides leadership and assistance to local school districts, school patrons, community organizations, and other educational constituencies on educational equity, multicultural education, human relations, Indian education, Title IX, Section 504, and affirmative action.

One of the primary objectives this past year has been to encourage the local school districts, institutions of higher learning, and the

parent community to work as coalitions to develop more effective networks in the development and delivery of educational programs and services to the under-represented student minorities and their parents. Programs that have evolved from this effort include:

CMAC (COALITION OF MINORITY ADVISORY COMMITTEES)

For the past several years, the State Board of Education has had appointed Asian, Black, Hispanic, and Indian Advisory Committees. In 1984 these committees formed the CMAC (Coalition of Minority Advisory Committees) in order to address shared goals and concerns. It meets on a regular quarterly basis, and already has, to its credit, the organization and implementation of a very successful statewide "Minority Parent Involvement Institute." The CMAC spearheaded the involvement of the State PTA, state and federal funding sources and the participating school districts as co-sponsors.

For the 1986-87 school year, the CMAC has as one of its primary objectives the development and implementation of a statewide "Minority Student/Parent Conference" to be held on a regional basis for the northern, Wasatch Front, and Southern Utah school districts. The proposed agenda includes workshops on the new graduation requirements, parental support/student education plans, and scholarship/financial aid opportunities.

MULTICULTURAL EDUCATION

Multicultural Core Curriculum Infusion Pilot Test Project

As a result of the formation of a coalition of minority educators from the Utah State Board Minority Advisory Committees and the Utah Asian Association, great interest was generated to multiculturally infuse the recently revised Utah Core Curriculum. The state Core Curriculum Committee and the Utah State Board of Education approved funding and staff participation in the development of a Multicultural Infusion Pilot Test Program to run concurrent with the 1985-86 Field Test of the Utah Revised Core Curriculum. The pilot test program is located in the Parkview Elementary School SLC School District, and Hillside, Farnsworth and Woodstock schools in the Granite School District. Materials and teaching strategies from this program were made available for statewide dissemination for the 1986-87 school year at the October 1986 UEA Convention and are available upon request through the Educational Equity Office.

One set of materials is ready as a follow-up to the Indian Maps and Charts that were disseminated to all district school libraries last year. Under the direction of the State Board of Education, Wil Numkena monitored and assisted in the development of the "Teacher Guide" that integrates these materials into the appropriate Core Curriculum Standards and Objectives. This "Teacher Guide" was disseminated to teachers at the October 1986 UEA Convention and is available on request through the Educational Equity Unit.

Computerized Multicultural Cross-Referenced Materials Bank

The Educational Equity Unit has purchased and modified a library cross-referencing computer software program that is being used to store the annotated reference information of multicultural teaching materials and the Core Curriculum Standards and Objectives with which they can be most appropriately used. This computerized system will also link the existing local school district multicultural libraries, thus providing an expanded resource bank for school teachers.

Computerized Multicultural Performing Artists/Presenters Bank

The Educational Equity Unit, in cooperation with the Utah Arts Council, the Musician's Union, and other performing artist resource contacts, solicited the applications from over 200 performing artists and presenters that indicated an interest in utilizing their skills to multiculturally enrich school curriculum programs. This information has been and will continue to be programmed into the computer bank so as to facilitate access by educators upon request. Efforts are continuing by the Educational Equity Unit and the Curriculum and Instruction International Education Program Director to build and computerize the Utah State Office of Education Artifacts Library so that those materials and the performing artists and presenters information become a Core Curriculum Standards and Objectives supplement resource for educators.

MESA/MEP (Math, Engineering, Science Achievement/ Minority Engineering Program)

The purpose of Utah MESA/MEP is to increase the numbers of under-represented minorities and women in math and science related professions. The MESA Program enriches the academic experience of minority and women junior and senior high school students and helps them to graduate prepared to challenge college work. At the university level, MEP provides supports needed by minority students to compete in the academic environment and subsequently the job market. Groups targeted for Utah MESA/MEP are Blacks, Native Americans, Hispanics, Pacific Islanders, and women.

In the spirit of the Governor's Education ALERT Program, local school districts, the Utah State Office of Education, the University of Utah, local industries, community organizations, and parents cooperate to provide the funding and support services needed to help Utah MESA/MEP operate. The organization is governed by a Board of Directors representing each of these groups.

Utah MESA/MEP has seen considerable growth during the 1986-87 school year. It has expanded from two schools in one district to seven schools in three districts (Granite, Jordan, and Salt Lake). It is estimated that over 200 students will participate in Utah MESA this year. The MEP program will continue to operate at the University of Utah's College of Engineering and will have over 80 college students starting school this fall.

CONTRIBUTIONS OF WOMEN

Women's Contributions to Utah Multicultural History

A specialized loan library which is being currently computerized has been developed for use by educators and the public. This library and curriculum items being developed provide educators with resources to meet the requirements of the revised Core Curriculum. A movie on women's contributions is being developed for this same objective.

Women Educational Administrators Network

A network has been developed among Utah Women Educational Administrators employed by local school districts and the State Office of Education to assist in promoting qualified women educators as administrators and to share their techniques and experiences.

ARTHUR L. BISHOP
Administrative Assistant
for School Finance and
Business

SCHOOL FINANCE AND BUSINESS

During 1985-86, the School Finance and Business Section functioned under direct jurisdiction of the State Superintendent to provide leadership, coordination, and general supervision to school districts and state government in (1) School Finance, (2) School Facility Planning, Review and Approval Services, (3) Student Transportation Services, (4) State and Federal Reporting, and (5) other school finance and business services, including school lunch auditing and legislative research.

School Finance Unit

The following major services were provided by the School Finance Unit:

1. Approximately $650,000,000 in state and federal funds were distributed to Utah school districts and certain state institutions.
2. Leadership, coordination, and supervision of school districts were provided in the following areas:
   (1) Budget preparation
   (2) Accounting
   (3) Auditing
   (4) Reporting
   (5) Program compliance reviews
   (6) Other areas of school finance
3. Instructional conferences and training workshops were conducted for school district personnel.
4. Financial data for school districts, the legislature, and other interested groups and individuals were analyzed and disseminated.
5. Leadership was provided in finance formula development and legislation.
6. Periodic audits of Child Nutrition Programs were performed.

School Plant Planning Unit

The School Plant Planning unit administered the allocation and distribution of Continuing and Critical State School Building Aid involving over half the school districts in the state. Facility planning, review, and approval services were provided to school districts to help them meet statutory and policy regulations relative to school plant construction. School plant property accounting records were analyzed and maintained.

A report on school buildings in Utah was made current to January 1, 1986, and critical school building needs were determined.

Consultant services and information were provided to school districts in the state, the State Board of Education and staff, the Legislature, and other public and private agencies on energy conservation, workshops, school buildings including utilization, school building finance, school plant planning, and alternatives to new construction. About 41 school building projects were reviewed.

Pupil Transportation Unit

The Pupil Transportation Unit worked closely with public safety enforcement agencies, the highway safety section, the Utah Highway Department, local school districts, local agencies, PTA and public patrons. This section was engaged in the following activities:

1. Planning and organizing statewide training programs for school bus operation in the state.
2. Developing guidelines for school bus drivers and safe operation of buses and other vehicles; providing instruction for riding

PART I
GENERAL PROBLEMS AND RECOMMENDATIONS

school buses; and supervising the operation of pupil transportation systems in school districts.

3. Assisting school districts in:
   (1) Surveys
   (2) Evaluation
   (3) Maintenance Operations
   (4) Organization
   (5) Planning
   (6) Forecasting
   (7) Budgeting in pupil transportation
4. Implementing a statewide information system for pupil transportation, statistics, cost accounting data, accident data, bus inventory, and financial information.

State and Federal Reporting Unit

The unit:

1. Coordinated the forms, collection, and dissemination of necessary data required for the State-Supported Minimum School Program, state and federal reports, budgets, and legislation.
2. Assisted in providing a data acquisition calendar and coordinated with data processing and the Education Data Acquisition Advisory Committee in coordinating data forms and collection of necessary data.
3. Developed standards and procedures for student accounting and other essential data for the Minimum School Program.
4. Analyzed, summarized, and disseminated meaningful data; completed state and federal reports; published annual bulletins and brochures.
5. Participated in training workshops and program reviews with local school districts.

PART II
OFFICE OF AGENCY AND REHABILITATION SERVICES

DARYL J. McCARTY
Associate Superintendent

The Office of Agency and Rehabilitation Services includes about 340 persons representing approximately 60 of the Agency's total staff.

Responsibilities include:

1. Internal agency areas of:
   - Personnel Management
   - Accounting
   - Purchasing
   - Publications
   - Developing of the Agency budget
   - Serving on the Agency's Legislative Committee
   - Building maintenance, operation and space utilization
   - Office of Child Nutrition Programs
2. The Division of Services for the Visually Handicapped which includes the Utah Industries for the Blind. Offices are located in Salt Lake City, Ogden and Provo.
3. The Division of Rehabilitation Services which includes the Disability Determination Services. Offices are located in Salt Lake City, Ogden, Brigham City, Logan, Farmington, the Utah State Prison, Provo, the Utah State Hospital, Spanish Fork, American Fork, Price, Vernal, Blanding, Cedar City, Delta, Richfield, St. George, and Manti. There is also a Utah Community Center for the Deaf located in Bountiful which falls under the jurisdiction of this division.
4. Utah Schools for the Deaf and the Blind

INTERNAL SERVICES SECTION

The Internal Services Section provides internal accounting services including financial budgeting, accounting, and reporting for the entire State Office of Education—a composite activity of analyzing, recording, summarizing, and interpreting every financial transaction affecting the Agency and serving as fiscal liaison for the Agency with all federal, state, and private enterprises.

Other areas of internal services within this section include purchasing, publications and building maintenance.

PERSONNEL SERVICES SECTION

During the past year the Personnel Services Section (Human Resources) has been assisting the State Division of Personnel Management with the new statewide Decision Band Method (DBM) job classification study and implementation. The purpose of this project is to correctly classify all state employee positions in regard to duties and responsibilities. A salary survey will then be used in determining proper compensation, or pay ranges, for each job classification.

Human Resource Management services have been provided on a continuous basis throughout the year. These services include job applicant and employee counseling, recruitment and selection of new staff, administration of all compensation and fringe benefits, job classification, records management, processing grievances, and other related services.

CHILD NUTRITION SECTION

During 1985-86, the services of the Child Nutrition Programs Section included general direction and assistance in the following areas:

1. School Lunch Program (38.4 million lunches served in public and private schools and residential facilities).
2. School Breakfast Program (739,500 breakfasts served in public and private schools and residential facilities).
3. Special Milk Program (228,000 ½ pints of milk served in public and private schools and residential facilities).
4. Child Care Food Program (8.9 million meals served in Child Care Food Program facilities).
5. Summer Food Services Program For Children (114,700 meals served in Summer Food Service facilities).
6. Food Service Equipment Assistance Program (Inventory Control).
7. U.S. Department of Agriculture Donated Foods (Commodity value $9.4 million).

The accompanying chart provides revenue source data for the Child Nutrition Programs for the 1985-86 school year.

SOURCE OF FUNDS
CHILD NUTRITION PROGRAMS
1985-86

PROGRAM	FUNDING SOURCE	AMOUNT
Lunch	Federal	$17,605,412
	State	$ 8,785,529
Breakfast	Federal	$ 546,040
Child Care Food		$ 5,160,527
Program	Federal	$ 109,731(CILO)*
SFSPFC (Summer)	Federal	$ 115,157
Special Milk	Federal	$ 23,435
FSEA (Equipment)	Federal	0
Commodity	Federal	$ 9,427,469
Student Payments/Other	Local	$27,750,000
GRAND TOTAL		$69,523,300

*Cash-In-Lieu-Of

In addition, the section performs administrative and nutritional reviews in districts and institutions to assure compliance with state and federal regulations; provides technical assistance as requested by participants; develops an annual financial and staffing plan; provides a prototype free and reduced price meal and free milk policy; interprets state and federal regulations; and provides guidance for overall program administration.

This section is committed to offering high quality, nutritionally well-balanced meals to the children of Utah, and recognizes that a properly balanced diet is essential to the physiological and mental well-being of developing youngsters. It seeks to expand the Child Nutrition Programs to nonparticipating schools and institutions and to maintain and improve the quality of current programs.

All public schools except six participate in the National School Lunch Program. These six schools have a very small enrollment. Residential child care institutions, private schools, child care centers, and family day care homes participate in the Child Nutrition Programs, in addition to the public schools of Utah.

The personnel of this section organized and conducted statewide workshops for local administrators in:

1. Program Management
2. Free/Reduced Price Policy Administration
3. Record Keeping (Financial, Nutritional)
4. Menu Planning

5. Quantity and Quality Food Production
6. Inventory Control
7. Computerization of Child Nutrition Programs

DIVISION OF SERVICES FOR THE VISUALLY HANDICAPPED

The Division of Services for the Visually Handicapped (DSVH) contains six specialized programs designed to meet the need of blind and visually handicapped individuals of all ages.

Two of the programs directed at individuals of employment age are partially funded with federal dollars. These programs are Vocational Rehabilitation and the Business Enterprise Program for the Blind. The remaining four programs are state-funded. The Utah Industries for the Blind provides full time employment and employment-related services to blind and visually handicapped individuals. It is a production business which produces finished goods from raw materials and does a variety of packaging tasks for private industry.

The Training and Adjustment Services Program provides special skills to individuals in classes held at the Murray B. Allen Center for the Blind as well as other locations throughout the state.

The Sight Conservation Services is responsible for screening people of all ages for visual problems as well as education in this area. The Low Vision Lens Clinic is also operated through this program and certain clients are provided special aids to help them obtain maximum usefulness from small amounts of residual vision.

The programs operate in close cooperation with each other and help provide Utahns with a basic, well-rounded, specialized program for the blind.

A brief description of the various program activities follows:

Sight Conservation Services

The Sight Conservation Services coordinates: statewide preschool visual screening, central file reporting and referral follow-up by licensed health professionals; instructs high school and university health education students regarding common visual anomalies; works with University of Utah resident eye physicians to conduct low vision lens clinics; and identifies and provides relevant services to exceptional children and other visually handicapped groups.

Sight Conservation/Low Vision Lens Services

The primary objective of Utah's Sight Conservation Program is to identify and thus correct or prevent unnecessary visual impairment.

Preschool amblyopia detection among Utah's 100,000 preschoolers and kindergarten children (3½ through 6 years of age) remains Sight Conservation's first priority.

During the past fiscal year, 56,180 preschoolers were vision screened, and 18,848 of these children were diagnosed as visually

impaired. We have received 852 follow-up reports, 135 have amblyopia, 8 crossed-eyes, 268 received prescription lenses, and 3 visual pathologies have been identified.

Delayed recognition of amblyopia is a critical factor in correcting it. Amblyopia concern centers around the 20,819 four and five-year-olds who are considered "hard to reach" because they were not screened last year.

Basic visual health education is presented to high school and university health students to better sensitize them to unsuspected, visual anomalies common in children.

Three other minority groups with unmet vision care needs have been recently documented in Utah:

1. Exceptional children
2. Utah's geriatric population was surveyed. It was verified that 774 failed to see better than 20/70 while wearing their prescribed glasses. Utah has 7,333 nursing home residents. Possibly 3,333 of these elderly people are only partially sighted, or legally blind.
3. Navajo Indians, living on the Navajo Reservation, have unmet vision care needs. During 1985-86, DSVH Sight Conservation professionals visually screened 753 Navajos. Two-hundred-seventy-one (271) were diagnosed as visually impaired and/or legally blind.

Two ophthalmologists responded to the invitation of Utah Navajo Development Council (UNDC) to perform on-site ophthalmological evaluations. During nine eye clinics conducted over a four-day period, 122 screening participants were carefully evaluated, 75 prescriptions for glasses were written, and 6 were referred for further ophthalmological evaluation.

Sixty percent of these reservation Navajos are below the poverty level. Extensive travel expense and payment for prescribed glasses are formidable obstacles for most of these visually impaired individuals. The working relationship between these Navajo people and Utah ophthalmologists is very good. Indian response to these new eye clinics is commendable.

Utah Industries for the Blind

At Utah Industries for the Blind (UIB), people are our business. Manufactured goods and subcontract services are our by-product. UIB is constantly seeking ways to expand facilities, services, and products to meet the needs of the blind and visually impaired of Utah.

Providing sheltered employment (44 people were employed in this category) and work training is our primary objective; however, UIB goes far beyond this objective and provides many more meaningful services, including:

- Vocational Evaluation—the identification of a person's strengths and needs in order to develop appropriate vocational plans for the individual. Twenty-one (21) people were evaluated this past year.

- Work Adjustment Services—short term training designed to meet a specific client's individual needs. These people are employed as transitional employees.
- Transitional Employment—short term employment, 18 months or less, designed to "bridge the gap" between programs and/or employment. Forty-one (41) people were employed in this category for FY 1986.
- Counseling—UIB also provides on-going client counseling to aid clients with a variety of problems. A total of 106 people were served. (This may include some people receiving more than one service component.)

1. **Self-Generated Revenues**—the largest source of funding, $738,108, for FY 1986, comes from the sale of products and services. This self-generated revenue consists principally of sales of brooms, mops, mats, and other commercial items, sales to the federal government, and sales to state and local government entities. The training given to UIB's marketing department by the Small Business Administration has aided in again setting sales records for FY 1986.
2. **Appropriated Revenues**—$260,737.30 in legislative funds appropriated through the Utah State Office of Education. These funds are used to offset the additional costs incurred because UIB is a sheltered workshop utilizing a handicapped workforce. For the past five years, these appropriated revenues have only risen by 24 percent while sales have risen 250 percent. The number of people served has tripled and the degree of handicap (or compounding handicapping conditions) has also risen sharply.
3. **Donated Revenues**—the smallest source for UIB is received in either cash contributions or donations of equipment. This past year we received a van from Mountain Bell. This donation has delayed the need for replacing one of UIB's delivery trucks for at least two years.

Training and Adjustment Services

Direct contact was made and services given to more than 2,000 blind and visually handicapped residents of the State of Utah. Three-hundred-ninety-nine (399) clients were processed for registration and assigned to appropriate caseloads during FY 1986.

Blindness or severe loss of sight may destroy a person's basic skills of free physical movement, written communication, and even self-care. It is the purpose of the Training and Adjustment Services Program staff to offer specialized support to more than 2,000 blind persons per year in their struggle to achieve independence and dignity following their loss of sight. This is an on-going, multifaceted challenge. Our clients require and receive extensive services, training, and adjustment skills, psychological and social orientation and provisions of adaptive equipment and techniques. The needs of this target group require professional service plus non-professional support,

materials, equipment and facilities. These resources reduce the client's dependence needs, increases their level of self-esteem, and lessens demand on family and community.

Curriculum and service procedures have been consistently updated to achieve improved quality and efficiency, ensuring clients an opportunity to develop those skills necessary in dealing with visual loss. More than 1,800 clients have been provided educational or casework services in their own homes. A primary thrust has been to emphasize teaching of the basic skills: communication, mobility, and self-care. This service is available to all clients, no matter what their age.

Short-term training courses were provided in selected areas. Comprehensive field services were offered in all but one county of the state. Two 16-week intensive training sessions were conducted to provide 42 new clients instruction in basic skills required to cope with blindness and prepare for vocational training and placement. Three successful one week programs in independent living, college preparation, technology, and job seeking skills for teenage clients were conducted at the Salt Lake Center. Most of these students lived in the dormitory during training.

More than 100 presentations and seminars were held to promote favorable attitudes toward blind and visually handicapped persons, their educational, social, and employment potentials. All members of the staff were involved in providing information in answer to questions asked by the public and clients.

Efforts are being made to establish curriculum and provide staff to meet the special needs of more than 200 blind persons who are also deaf or severely hard of hearing.

Approximately 3,400 pieces of sound-reproducing equipment provided by the Library of Congress are in our inventory and provided to clients in compliance with PL 89-522. More than half of our total caseload of 4,000 clients are provided equipment, free of charge, needed to reproduce sound-recorded books and magazines available for the blind and visually handicapped.

Our Social Workers have maintained liaison with approximately 120 nursing homes and care centers in order to provide advocacy and assure proper care for blind and visually handicapped residents. These Social Workers also offer specialized assistance in location of housing, marital and financial counseling, and personal adjustment to more than 200 clients.

Professionally trained staff offer orientation and mobility training to at least 200 blind or visually handicapped youths and adults.

There are 1,986 legally blind persons and 1,716 visually handicapped persons listed on our present registry. We are also in touch with many persons who are considering our service but are not yet registered.

While FY 1986 has been a very productive year for UIB, this growth has not been without problems, nor is it complete. The number one concern is for the severely multiply handicapped blind. These people

are currently not receiving service or are being underserved. A program to provide for their needs must be developed. To achieve this, we have been negotiating with the Division of Services for the Handicapped. If funding were available, UIB could begin providing Work Activity Services to these people as soon as January, 1987. Our second area of concern is for manufacturing and training equipment. If UIB is to continue providing employment and training for our workforce, we should do so with equipment comparable to that found in the private sector. This means keeping abreast of technological changes as well as maintaining, upgrading, and modifying existing equipment. This is a task for which UIB currently lacks funds to accomplish on even a limited scale.

In summary, UIB has met (for a portion of the blind population) its primary goal. There have been advances in employee productivity wages and sales. There still needs to be program growth in providing for the multiply handicapped blind and in providing proper equipment upgrading so that UIB can continue to meet the needs of the blind and visually impaired adults of Utah.

Business Enterprise Program

The federal 1936 Randolph-Sheppard Act enabled the Division of Services for the Visually Handicapped to establish a Business Enterprise Program (BEP) in 1943 under the authority of Code 55-5-1 through 55-5-8 of the Utah State Law. It was amended in 1947 and 1971 in order to meet the contemporary employment needs of blind Utahns.

Three BEP staff people manage 19 vendors and vending facilities which consist of cafeterias, snack-bars, gift shops, and vending machine locations. However, BEP regulations allow for various types of small business endeavors other than the major industry of food services.

During the fiscal year 1986, the following goals were accomplished by the BEP: (1) Training and placement of five blind vendors; (2) Installing two new facilities (3) Remodeling one facility; and (4) Achieving a gross income of $811,296 for facilities statewide and $164,521 net proceeds for vendors.

The Business Enterprise Program is a financially self-sustained, viable program which provides self-employment opportunities for people with blindness and provides a valuable community service for tenants, employees and visitors at the various building sites.

Vocational Rehabilitation Program

The history of the federal-state vocational rehabilitation program began with the passage of the Smith-Fess Act which was signed by President Wilson on June 2, 1920. The legal basis for creating individual rehabilitation programs for the blind, separate from all other disabilities, is the Barden-Lafollette Act which was signed by President Roosevelt on July 6, 1943. The Utah State Board of Education made the decision to separate the blind rehabilitation program from the

Division of Rehabilitation Service and to place it with related service programs under the Division of Services for the Visually Handicapped, effective January, 1977.

The purpose of the Division's vocational rehabilitation program is to assist individuals with visual disabilities to prepare for, obtain, and maintain employment along with various non-remunerative occupations. This is accomplished through individualized programs with such services as diagnostic evaluation, counseling and guidance, mental and physical restoration (inclusive of eye surgeries and appliances) training, job placement and post-employment services.

During the past year, the Vocational Rehabilitation Program has accomplished a number of significant goals. The percentage of clients who achieved competitive employment was doubled. A Braille printer was installed and adapted to produce Grade II Braille for clients and visually handicapped rehabilitation counselors at the Division of Services for the Visually Handicapped. Four large print closed circuit television units were presented to universities and colleges throughout the State of Utah for visually impaired clients involved in training programs at these institutions. New management policies were developed and initiated to streamline the program for more rapid and beneficial client services. Progress toward a statewide public awareness program to promote client referral sources, contact with employers, and improvement of the visibility of the needs of visually handicapped citizens were accomplished. A statewide needs assessment study to survey the needs of visually impaired individuals was written and is being conducted. Four-hundred-twenty-five severely disabled individuals received vocational rehabilitation services.

Eighty-six percent of the severely disabled visually handicapped were rehabilitated, or are actively involved in a vocational rehabilitation program.

DIVISION OF REHABILITATION SERVICES

The mission of the Division of Rehabilitation Services is to assist eligible individuals with handicaps to obtain employment and increase their independence and to adjudicate disability claims for the Social Security Administration. In carrying out this mission, DRS administers three major programs and many supportive projects, e.g. Vocational Rehabilitation, Independent Living Rehabilitation, and Disability Determination Services.

Vocational Rehabilitation

The main thrust of Vocational Rehabilitation is to work with individuals who have physical, mental or emotional disabilities which impair their ability to secure or hold employment and for whom vocational rehabilitation services can assist the individual in achieving competitive employment.

PART II
OFFICE OF AGENCY AND REHABILITATION SERVICES

The Vocational Rehabilitation Program has proven itself over the years. Since its inception, the program has been regarded as one of the most successful programs in helping individuals with handicaps become independent. It is not only seen as a humanitarian program, but as a cost-effective investment in people. Two of Vocational Rehabilitation's many cost-effective accomplishments are the annual savings generated from decreased public welfare payments, and the annual increase in tax revenue generated from handicapped individuals becoming employed. Statistics show that the rehabilitation of clients will return to the government ten dollars in benefits for every dollar expended by the Vocational Rehabilitation Program.

In order to maintain a viable, cost-effective program, the Vocational Rehabilitation Program has stressed, as a top priority, management effectiveness and the capability to sustain momentum of the delivery of services to the handicapped population in the State of Utah. During Fiscal Year 1986, the Division served approximately 17,000 clients, of which 2,000 were expected to complete their rehabilitation programs and be closed as gainfully employed. Of these employed, 50 percent were categorized as severely disabled, and 15 to 20 percent of the clients finishing their programs were removed from public welfare rolls.

Independent Living Rehabilitation Services

Since 1981, the Division of Rehabilitation Services (DRS) has been involved in the development of Independent Living Rehabilitation Services (ILRS). The purpose of this program is to provide opportunities for severely disabled individuals to increase their independence in their homes and community. The severity of the disabilities of these individuals has many times made it impossible for them to benefit from the vocational rehabilitation program.

The Independent Living Program is divided into two major parts: the development and operation of an Independent Living Center, and direct ILR services to individuals. The Division of Rehabilitation Services has contracted with the Utah Independent Living Center, Inc. of Salt Lake to develop an independent living center to provide services needed by severely disabled individuals.

During Fiscal Year 1986, the Division of Rehabilitation Services began providing direct ILR services to individuals. These services have provided severely disabled Utahns with opportunities to increase their functional independence and in some cases enabled the individuals to increase their functioning to a level where they can now benefit from the vocational rehabilitation program. ILR services have been provided mainly in the Wasatch Front area. DRS is currently in the process of developing a statewide delivery system of ILR services which will reach severely disabled individuals previously not served by this program.

Disability Determination Services

The Disability Determination Services (DDS) in Utah adjudicates all disability claims in Utah under Title II and Title XVI of the Social Security Act.

The Social Security Act was originally passed by Congress over 50 years ago to provide a source of income for workers too old to work. Many people were unable to work due to disability and this was a devastating loss, since most of the disabled people were not yet eligible to receive Social Security Benefits because of old age. In 1954, the Social Security Act was amended to create a disability freeze program which froze eligibility for benefits until 62 or 65 for disabled workers. The state Disability Determination Services made these first medical determinations of disability. From that time until the present, categories of people covered under disability programs and benefits have been progressively expanded. New regulations put into place "state-of-the-art" determination of disability.

A decision as to whether a person is disabled is made by a physician and disability evaluation specialist considering medical evidence, as well as other related factors. In Fiscal Year 1986, the DDS adjudicate approximately 9,000 claims. Each disability examiner has an average caseload of about 100 cases and adjudicates over two cases per day. Each claim that is allowed averages disability benefits of approximately $70,000 over the life of the disability claim.

About 1980, the federal government recognized Social Security Trust Funds were being paid to some people not disabled. This finding necessitated an increase in review of cases where people were receiving benefits. These continuing disability investigations caused some problems because of the number of people terminated and the lack of understanding by the public of what was being done. Some significant changes have been made for continuing disability reviews. A key provision in the law now employs a "medical improvement standard" for reviewing continuing eligibility for disability benefits.

In the past 29-year history of the Disability Program, there have been continual changes which insure that the needs of society and the disabled will be met. Public Law 98.460 requires a revision of the way claimants with mental impairments are evaluated. There is also greater emphasis of the need for well-documented cases and for using the latest in medical advances in diagnostic assessment. The program has experienced tremendous growth, and now over 18 billion dollars a year is paid out in disability benefits, from only 3 billion 15 years ago.

Utah Supported Employment Program

The Division of Rehabilitation Services (DRS) was awarded a five-year federal grant in the Fall of 1985 to develop a statewide program of Supported Employment. Four other agencies are participating in the project along with DRS: the Special Education Section, and Division of Vocational Education in the Office of Education, the Division of Services to the Handicapped and Division of Mental Health in the

Department of Social Services. Supported Employment is a strategy to obtain and maintain employment for persons with severe disabilities. The concept combines paid work opportunities with ongoing individual support to keep people in regular community jobs.

Seven new projects of Supported Employment were established during the first year of the program. The following service providers have been contracted with to develop and implement the services: Pioneer Adult Rehabilitation Center, Clearfield; Columbus Community Center, Salt Lake City; Timp Industries, Lindon; Central Utah Enterprises, Provo; Sanpete Community Training Center, Ephraim; Four Corners Mental Health, Price; and Washington County ARC, St. George. It is anticipated that 70 individuals with severe disabilities will become employed through this program during Fiscal Year 1986.

Deaf/Hearing Impaired

Services to people with deaf/hearing impairments are provided to eligible clients through traditional vocational rehabilitation services specifically oriented for the individuals. Additional services are also available including: independent living training, telecommunications/assistive devices, coordination and provision of interpreter services, adult education, information and referral, library on deafness and hearing impairment, technical assistance to the public in the area of hearing impairment, and a special project designed to identify and coordinate services for persons that are deaf/blind and their families.

The Utah Community Center for people that are deaf/hearing-impaired, located at 388 North 400 East in Bountiful, houses most of the above-mentioned programs, assisting individuals with deaf/hearing impairments and their families to deal more effectively with the problems they encounter in daily living due to the unique implications of their disability. Additionally, the Center affords housing for the many organizations of and for people with deaf/hearing impairments.

During 1986, over 4,500 individuals received specialized services designed to assist them in maximizing their vocational potential and their quality of life in Utah.

Inservice Training

Ongoing, intensive inservice training is a necessary component for Rehabilitation Services' staff because of the rapidly changing milieu in services and products available for individuals with handicaps, as well as people with handicapping conditions that are living to adulthood with new medical and technological advances who require rehabilitation services. Inservice training was conducted for staff on many subjects determined by individual training needs assessment, program evaluation and agency priorities. University classes were supported for employees in accordance with Personal Development Objectives and job relevance. Special training emphasis was placed upon case file content, reviewing job placement procedures, transition and supported employment, supervisory communication skills, and serving the severely disabled.

Training was provided for several student interns from various university counselor training programs. In addition, training materials were developed and acquired for use in inservice training, including continued development of a Division library. The Division co-sponsored the Sixth Annual Conference of Agencies and Organizations Serving Disabled Persons and the inservice training specialist served as conference chairperson.

Projects With Industry (PWI)

During 1986; The Division of Rehabilitation Services (DRS) developed a specialized training program (McJobs) for individuals with severe disabilities with the McDonalds Corporation. Through this program, individuals with severe disabilities will be trained to work in McDonalds' fast food stores. Individuals selected for the program are trained on the job by a McDonalds' supervisor. It is anticipated that 24 individuals will complete the training and become employed this year.

The Division of Rehabilitation Services, IBM, Salt Lake Skills Center, and a local Business Advisory Committee have developed a Computer Programmer Training Program for severely disabled individuals. The Division of Rehabilitation Services is responsible for identifying students, referring them to the program, and maintaining support services. The Salt Lake Skills Center provides the training and administers the day-to-day operation of the program. The Business Advisory Committee has been responsible for developing the curriculum, screening applicants, evaluating student progress, and developing internships and placements. This cooperative effort has provided a unique approach to solving the problems of the severely disabled. During the last two years, 20 students have graduated from the program, with 17 being placed as computer programmers in businesses throughout the Wasatch Front. An additional 10 severely disabled students are undergoing training at the present time.

A third PWI program involves the Maurice Warshaw Foundation for Employment of the Handicapped and the Division of Rehabilitation Services (DRS). In this program, the Warshaw Foundation works directly with employers in promoting employment of the handicapped and placing DRS clients in jobs. This year, 175 handicapped individuals will obtain employment through the assistance of this program.

Rehabilitation Service Center

The Rehabilitation Service Center (RSC) was established to assist handicapped individuals and rehabilitation counselors in developing and carrying out individualized rehabilitation programs. Special emphasis at the Center has been placed on serving the severely disabled, with the ultimate goal of helping them achieve competitive employment. During 1986, the RSC provided the following services:

	Number Served
Vocational Evaluation	1044
Psychological Services	750
Information and Referral	1600
Employment Readiness Training	281
Job Placements	471
Rehabilitation Engineering and Technology	255

UTAH SCHOOLS FOR THE DEAF AND THE BLIND

The primary objective of the Schools is to provide a comprehensive education program for all hearing-impaired and visually-impaired children in the state of Utah beginning with birth through high school graduation or age 21. Dr. George Howell served as superintendent until September, 1986, when Thomas S. Bannister assumed the superintendency.

UTAH SCHOOL FOR THE DEAF

The Utah School for the Deaf offers a day and residential program in Ogden as well as day classes for the deaf in a number of other cities. Day classes are also part of the School's Extension Division and are housed in public schools in Logan, Orem, Provo, Salt Lake City, Richfield, Delta, Moab and St. George. These classes are carefully placed in public schools so that only two or three classes are housed in each school in order to provide all levels of instruction, but not necessarily in the same school.

The Utah School for the Deaf offers two programs of instruction, one using the Oral/Aural approach and the other using the Total Communication approach. This is a prospectus unique to the state of Utah.

State-wide Parent Infant Program

This service is available from birth to age four and one-half. It is in cooperation with the Utah State Division of Health, which screens infants in hospitals and offers assessment and evaluation of children through audiological testing and language testing. Fitting of hearing aids, parent counseling and education, facilitation of language within the home on a weekly visit by an advisor, and monthly parent group meetings are also part of the program.

Preschool Classes

This service is available to children two and one-half to four and one-half years of age. Daily half-day sessions are held which include developmental activities used in preschool for hearing children but with greater emphasis on language and communication development.

Individual or small group instruction in listening and cognitive skills, parent counseling and education, systematic audiometric and psychological testing and assistance in selection and evaluation of hearing aides are also part of the preschool.

Primary and Secondary Classes

Classes are housed in regular public schools, in various geographical locations throughout the state. This service is for ages four and one-half upward. The School has developed speech, listening skills, language, and reading curriculums which give cohesion to the educational program. Public school guides are also used and adapted in all subject areas.

Multiply Handicapped Classes

Opportunities are being expanded for multiply handicapped students in need of additional services or different program approaches. A carefully structured multisensory approach is employed in special classes for multiply handicapped hearing-impaired children.

Career Education and Prevocational Programs

A prevocational program is organized to prepare students in elementary grades at the School for the complex demands of vocational preparation. Students are exposed to general occupational areas and homemaking skills. A counselor provides a program of education and on-the-job training, working with other state agencies, local business, and the State Division of Rehabilitation Services. Programs are available in woodworking, auto body, electricity, graphic arts, business and home economics. Career exploration evaluations are conducted on students in the junior and senior high school. The school curriculum includes more than the twenty-four subjects which are rotated so that all students on the Ogden campus will have exposure to all of them during their school years. Students in the Extension Division generally follow the public school vocational program with assistance from the vocational specialist.

Integration and Mainstreaming

Those students, both oral and total communication, who demonstrate adequate communication and academic skills to the staff, are integrated on a trial basis into public school classes in one or more subjects in which they are apt to succeed. The integration process is expanded as the student continues to demonstrate the ability to succeed. Mainstreaming back into the public school often occurs when the educational team recommends such a move. The team is composed of staff from the School for the Deaf and the public school staff members.

Audiological Services

Pure-tone audiological testing and speech reception threshold, together with hearing aid counseling and evaluation, is provided by the School free of charge. All students are tested on a regular, on-

going schedule with and without amplification. A hearing aid bank is maintained for back-up services to children.

Psychological Testing and Behavior Management

Psychological testing, both verbal and non-verbal, is provided for all students and referral to other state agencies is made as needed. General aptitude test batteries are conducted annually for students pursuing career planning. Assistance to severe behavioral problems is provided to children having difficulty in school.

Dormitory Services

The School maintains a Residential Living Program in Ogden for those students who live beyond daily commuting distance. Several oral/aural students in the Weber County area are placed in a Foster Care Program. Total communication students are living in the two residential dormitories located on the Ogden campus.

Foster Placement

The School provides foster placement when the IEP makes such recommendation. Certified social workers provide an opportunity for personal consultation and guidance to families housing hearing-impaired children in the Foster Care Program.

Deaf-Blind Program

The Deaf-Blind Program has the primary goal of educating students to learn to live in the world as productive people. Although each student may not achieve the goals of independent living and working, it is imperative to help each pupil develop their maximum life survival-coping capacity.

Medical Support

Medical support and consultation are provided for all students whenever required. A registered nurse is on staff to administer medications under a medical doctor's prescription.

UTAH SCHOOL FOR THE BLIND

The academic program of the Utah School for the Blind parallels that of the public schools. However, special methods of instruction, equipment, and materials are used. The educational program is a continual process of development and evaluation. Every effort possible is made to individualize and strengthen the curriculum to meet the needs and capabilities of the students enrolled.

The majority of students come from the Wasatch Front area of Utah and are served on a day basis. Since two classes of the Salt Lake City Satellite Program were opened in 1980, the program has grown to five classes at East Mill Creek and eight at Canyon Rim schools in the Granite School District. Two additional classes were

also started in the Alpine School District in 1983-84. Presently there are three: two at Manila and one at Windsor. Present trends indicate that the Satellite Program will continue to grow faster than the residential portion of the School. Thus the majority of the students enrolled now are day students with two-way transportation furnished by the School.

The residential component of the School mainly serves the outlying areas of the state and multihandicapped students. Most of the rural school districts do not have teaching programs specifically for the visually impaired. It should be noted that over 90 percent of the visually impaired students enrolled at the Ogden Campus are multihandicapped. In recent years there has been a shift in the School's population from secondary to preschool/elementary. The population of the School continues to become younger every year.

State-wide Parent-Infant Program

Since 1970, the Utah School for the Blind has attempted to serve the needs of visually impaired preschool children. For many years, only one person was on staff to serve this population of visually impaired statewide. Beginning in 1977, additional funds were provided to increase the number of staff and services for the preschool child. As a result, the present Parent-Infant Program was eventually initiated with five parent advisors being trained. They served in local areas on contract.

By regularly contacting many agencies throughout the state, the present referral system was developed and most preschool visually impaired children are identified before they are a year old. An infant development nurse with a background in early childhood development directs the program. She assists parents in locating services that serve the specific needs of the child. As soon as the nurse deems advisable, a trained parent advisor is assigned to visit the home on a weekly basis. The parent advisor usually works with the parents and child until age three. At that time, if sufficient developmental progress has been made, the child becomes eligible for one of the center-based preschool programs.

Preschool Program

Since 1980, a center-based preschool program has been available for most visually impaired children in Utah. At age three, a placement decision, is normally made by an IEP placement team, comprised of the infant development nurse, the parent advisor, the parent, a teacher and administrator from the Utah School for the Blind, and a representative from the child's local school district.

A variety of placement options are available. The child may remain in the Parent-Infant Program, transfer to the Utah School for the Blind's Preschool Program, or enter a local neighborhood preschool or other agency. The School offers a center-based preschool program in Ogden, Salt Lake, Manila, and Orem.

Kindergarten

At age five the visually handicapped child becomes eligible for kindergarten. Classes are available in Weber, Salt Lake and Utah Counties. This program focuses on "school readiness" as all kindergarten programs do. Two-way transportation is provided each day.

The beneficial results of all these preschool programs have been a more accelerated development for visually handicapped children. Many "blindisms" and developmental complications are avoided and the children are more prepared for school. Earlier mainstreaming results for most of the visually impaired children because of this early intervention.

School Program

The programs at the Utah School for the Blind are located in Ogden, Salt Lake City, Manila, Tooele, and Orem. Visually impaired and multihandicapped visually impaired children are served between the ages of six and twenty-one. A rich environmental experience specific to their needs is provided for young visually impaired students. This program enables them to learn from concrete examples and real-life situations using their remaining senses and any residual vision they have. Early training is given in large motor activities to assist in the development of orientation and mobility skills. Tactile senses are developed to help the student in distinguishing sizes, shapes, textures and the location of objects. Increased development of tactile skills assists those students who need to learn Braille.

As students progress through their school years, a general education program similar to the public schools is available to them. Instruction is given in language arts, social studies, science, mathematics, health and physical education. Some additional areas of instruction vital to the development of a visually handicapped student are living skills, orientation and mobility, typing, music, swimming, low vision skills, braille and electronic reading devices. All are extremely valuable skills for students who will later be mainstreamed into the public schools.

Integration and Mainstreaming

The goal of the educational program is to prepare students to perform adequately in the public schools when at all possible. A number of visually impaired students are integrated part time in the local schools adjacent to Utah School for the Blind. Visually impaired students attending extension classes are also mainstreamed into adjoining classrooms with sighted peers. In recent years, this part time attendance in public school has expanded to ycunger and younger students so that some first and second graders are now attending Ogden elementary schools for part of the academic day. When students are prepared to be mainstreamed they are encouraged to return to their local public school for full time enrollment.

Prevocational Program

Career awareness has been infused in the curriculum for many years. With an increased enrollment of multihandicapped visually impaired students having difficulty with the traditional academic program, the faculty felt a need for more of a prevocational program. This program teaches prevocational skills and attitudes that will be helpful to students preparing for future training programs or employment.

Autism Program

The Autistic Program is an intensive short-term (about two years) residential program for autistic children ages five through twenty-one with extreme behavior problems. Children requiring a highly structured, restrictive twenty-four hour program within a residential educational setting may be placed here via the IEP placement process. School districts may refer very difficult to manage autistic children to the program by inviting the staff to a placement meeting. Through the IEP process specific behavioral goals are determined. The primary emphasis is to reduce these inappropriate or destructive behaviors that allow the child to return home and enjoy a less restrictive educational environment as soon as practicable in accordance with the IEP objectives.

Residential Program

Students outside a fifteen mile radius of our center-based program may be served by the dormitory during the week. However, any student through the IEP process may be served by the dormitory for special needs. Most students leave the dormitory each weekend. Some who live long distances from the school remain in the dormitory over the weekend. They travel home monthly, usually over holiday weekends. Vans pick them up Sunday evening at a variety of stopping points from Logan on the north to Orem on the south and bring them to school. Friday after school, parents or other family members meet them at the same pick up points for the weekend at home.

The dormitory is an extension of the visually impaired student's school day. Many of the extra skills that visually impaired students have to master are offered during dormitory hours. They teach daily living skills, apartment living, orientation and mobility, personal hygiene, recreation skills, social skills, cultural appreciation, and physical fitness which are integrated into the dormitory schedule. Teachers, specialists, and counselors coordinate classes, field trips, and training sessions to partially accomplish this in the after-school hours.

Students have specific times scheduled for completing academic and prevocational home work assignments. The counselors assist students with the drill work required to acquire the specialized skills necessary to overcome problems associated with the visually impaired.

Familiarization Field Trips

Visually impaired students require actual experiences more than their sighted peers. Films, books, pictures, etc. do not convey an adequate concept to the visually impaired. Therefore, typical fieldtrips to the fire station by public school classes as enrichment for sighted children are almost manditory for sightless children. Their need does not stop with enrichment visits to banks, workshops, grocery stores, etc. "Hands-on" experiences are basic to gaining a more complete concept of their world. Preparation in the classroom with periodic visits to the community is routinely made as part of the school and dormitory programs.

Orientation & Mobility/Living Skills

The highly specialized skills required to travel with a cane (O&M) and required to complete the tasks of daily living are taught by specialists. The skills are taught at school, in the home and in the dormitory. Dormitory counselors and teachers reinforce the skills during all activities. Parents are encouraged to attend student training sessions at school and some sessions are even conducted in the home. Skills are internalized faster when parents understand the skills and are supportive.

Medical Support

A registered nurse is available during the day time and on call twenty-four hours per day. Medications prescribed by the child's doctor are dispensed under the supervision of the nurse. The general health of each child is monitored. Recommendations are made for parents to visit with the child's doctor if serious symptoms are detected. Minor accidents are treated locally by the nurse. When more serious mishaps occur requiring emergency treatment the nurse accompanies the child to a local hospital. Parents are immediately notified.

Teacher Consultant Program

Visually impaired students attending regular classes in rural school districts receive assistance from teacher consultants on a weekly basis. The teacher consultants are certified teachers selected in various rural areas by the Outreach Services Program Coordinator and trained in the specific needs of the visually impaired. The Program Coordinator supervises their activities, provides supplies, and assists as needed. This makes it possible for more students to attend their local school. The Teacher Consultant Program was a continuation of a grant from the Utah State Office of Education.

Teacher Training Program

Classes were offered under the auspices of the University of Utah to teachers desiring to obtain a visually impaired teaching certificate. These classes were conducted by staff members. There were 18 people statewide that participated in the program.

PART III
OFFICE OF PLANNING AND EXTERNAL RELATIONS

PART III
OFFICE OF PLANNING AND EXTERNAL RELATIONS

ROBERT L. LEAKE
Associate Superintendent

FY 86 was a positive, yet challenging year. Education reforms, including Career Ladders, Year-Round Schools, modified school schedules that increase school building use, creative and inventive productivity models, school business partnerships, the increased use of technology for management and instruction, and increased student performance, all contributed to an elevated level of excitement and purpose in schools.

Cooperative and collaborative efforts with the State Board of Regents and the Utah School Boards Association were accomplished via two active formal liaison committees. Efforts were made to encourage efficiency, productivity and cost-effective articulation of public school and higher education programs. A substantial emphasis was given to vocational education, including statewide needs for short-term, intensive job training. Area vocational centers and their relationship to secondary schools and institutions of higher education received considerable attention.

Major efforts were undertaken to assure a better informed public about Utah's new Core Curriculum, increased high school graduation requirements, and the pivotal role of Career Ladders in educational reform.

There was an increasing demand for the sophisticated computer programs and services offered to Utah's 40 school districts, the four Area Vocational Centers and the Utah State Office of Education. This education computer network is servicing education in cost-effective

ways, saving the state and local school districts millions of dollars.

Substantial assistance was given to the Constitution Revision Committee and the Title 53 Revision Committee. There is an expanding workload in law related school matters.

Work with the 1986 Legislature brought challenge after challenge as budget revisions were made downward on three occasions. As the session proceeded, the agency staff led by Superintendent Bernarr S. Furse, was called upon for information and testimony throughout the 45-day session.

Numerous assessment and evaluation studies which measured the effectiveness of the total state system and special projects were accomplished, including the most recent report on Utah Educational Quality Indicators.

Short-term and long-range planning, along with issue management needs were assigned to the section of School Planning and Development. While the 1986 Legislature funded ($100,000) an increased effort in planning, revenue projections for FY 88 along with Governor mandated budget cuts for FY 87 have delayed implementation of expanded efforts in planning.

In summary, the Office of Planning and External Relations has continued its role as an action, service, and planning arm of the State Board of Education and the Utah State Office of Education. Organization and staff assignments have been altered to aggressively move the Action Goals of the State Board of Education forward. In many respects, the staff of the office has become the action staff for many of the Board reforms. The work is exciting, challenging and rewarding.

EVALUATION AND ASSESSMENT SECTION

Major Accomplishments

The Evaluation and Assessment Section provided a variety of different kinds of leadership and technical assistance in the areas of research methodology, evaluation, measurement, and needs assessment to the staff of the State Office of Education and local education agencies. This included a broad range of projects such as the design and analysis of needs assessment measurement instruments, data analysis projects, and reporting. Activities ranged from helping clients design their own studies, to carrying out major intact studies in the specific areas listed above. The following are examples of the major projects and accomplishments of the Evaluation and Assessment Section during Fiscal Year 1986.

The Utah Educational Quality Indicators Program

During FY 86 the Evaluation and Assessment Section published the 6th Edition fo the Utah Educational Quality Indicators report series. This report series capitalizes on performance information collected from sources within the state education system, as well as sources

which are independent of the school system. Some of the major sources of information which were reported in this 1986 Edition were:

1. American College Testing Program Results (ACT)
2. Advanced Placement Results (AP)
3. Adult Educational Attainment
4. Scholastic Aptitude Test Results (SAT)
5. Summaries of national and international studies of educational achievement

The Utah Statewide Educational Assessment Program

During the past fiscal year, planning took place for the accomplishment of the 1987 Utah Statewide Educational Assessment Program. This is the continuation of a program which has been functioning since Utah initiated a program of statewide assessment in 1975. The 1987 assessment will be the fifth major study in the program and will include a random sample of approximately 65 elementary schools and 30 high schools statewide. Approximately 8,000 fifth and eleventh grade students are projected to be included in the sample for the study. Some of the major areas to be measured in the 1987 study are the following:

Mathematics
English
Reading
Career Exploration
Art Achievement
Music Achievement
Academic Self-Concept
Peer Relations

The Utah Statewide Assessment Program will again use sophisticated data processing and report generating techniques to provide information on the status of student performance across the state as well as research information on the relationship between student performance measures and other important variables such as demographic factors and aspects of educational processes. The program uses both norm-referenced and objectives-referenced tests, as well as measures of school-relevant student attitudes.

Individual student and school reports will be provided to all Utah elementary and high schools in the sample. The major statewide findings of the study will be reported in both a general report, as well as an executive summary of findings.

Other Evaluation and Assessment Section Accomplishments

In addition to the major efforts described above, the Evaluation and Assessment Section accomplished the following activities and projects:

1. Major technical assistance was provided to eleven Utah school districts during FY 86. Technical assistance and/or consultation in technical areas was provided for over thirty State Office of

Education staff members/projects.

2. A major study was completed dealing with the attitudes of Utah teachers statewide concerning the state's Career Ladder program.
3. An analysis of the patterns of courses taken by Utah seniors during 1984 and 1985 was completed.
4. In conjunction with the Division of Curriculum and Instruction and the State Economic Development Bureau, a statewide study of student opinion concerning economic development was accomplished.
5. A survey of public opinion and attitudes towards potential cuts in school services and the public's willingness to support tax increases for schools.
6. In conjunction with the Office of Curriculum and Instruction, a system for accomplishing the formative evaluation of the state core curriculum standards and objectives was designed.
7. The Section provided leadership in the formation of a core curriculum assessment planning committee which produced a major concept paper on measuring student performance in relationship to the core curriculum.
8. In cooperation with the Jordan School District, the Section accomplished a study which profiled the characteristics of high school graduates in the district as compared with the statewide picture.
9. The Section provided assistance to the Box Elder District in planning the evaluation of a trimester program at Box Elder Junior High School and also created a special student attitude measurement device which was administered by the district prior to the implementation of the program.
10. In cooperation with the Tooele School District, the Section completed a study of attitudes of the professional staff in the district in respect to alternative schedules at the secondary level.
11. The Section provided both leadership and technical assistance in working with two projects focused on providing measurement resources to assess student performance in relationship to the core curriculum. This included a project with the U-SAIL consortium of school districts (Davis, Granite, Jordan, Iron, Murray, and Tooele) which produced field test forms of elementary mathematics end-of-year tests. A second project was carried out by the Murray School District in the area of developing a test item generator as part of that district's computer managed instruction system.
12. In cooperation with Alpine School District, the Section provided data analysis support for the evaluation of the first year of implementation of a year-round school program at the Orchard Elementary School.

13. A major project was initiated in the area of collecting test item banks to support measurement of student performance in relationship to the core curriculum.
14. A program audit function was accomplished for the Distance Accelerated Learning Project as was the provision of data analysis technical assistance.
15. Data analysis support was provided for revision of the school bus transportation formula.
16. The Section provided data analysis assistance to the Office of Vocational Education in estimating equity indicies for vocational education programs across the state.
17. Data were collected and a report prepared describing the participant evaluation of the 1985 Law Related Education Program Mock Trial Competition.
18. Evaluation of several statewide conferences were completed. These projects included designing evaluation forms as well as data analysis and reporting.
19. Two meetings of the Utah Testing and Evaluation Council were held during FY 86. The Council continues to provide a resource for educators at the district and state levels whose responsibilities lie in the areas of evaluation and assessment. The Council is a joint effort on the part of the State Office of Education and Utah school districts to share professional information and enhance the effectiveness of testing and evaluation statewide.
20. Technical assistance was provided to several school districts in the state as they went through the process of selecting district-wide norm-referenced tests.

INFORMATION AND INSTRUCTIONAL SYSTEMS

The Information and Instructional Systems Section (IIS) is charged with providing information services to the Utah State Office of Education and the local school districts of the State of Utah.

The past year has again been characterized by substantial growth in the number of services offered and the number of districts which are now taking advantage of those services.

IIS has three units: Marketing and User Support Services, Systems Support Services, and Information Services. During the school year 1985-86, our on-line terminal support exceeded 1,000 terminals, which was the result of the continued implementation of the Student Information System (SIS) as well as other on-line data base access facilities.

The section presently operates an IBM 4381 mainframe computer with 16 megabytes of memory and supports a telecommunications network which extends from Logan on the north to St. George, Kanab, and Monticello on the south, and from Wendover on the west to Vernal on the east. Virtually every school district in the State of Utah now has access to this educational support network.

Because of the cooperative use of data processing hardware and software to solve information systems problems by the school districts, the cost to the State of Utah for these services has been dramatically and significantly minimized.

Systems Support Services

A major effort is being made to support the second largest telecommunications network in the state without degrading service. This is being accomplished with 50% less staff than comparable networks. The current network contains 29 lines with in excess of 1,000 terminals connected.

Modifications continue on all systems to perform additional functions the districts and USOE users request.

The following list is a sample of the currently available systems utilized by the districts and the State Office of Education:

E-MAIL
FUTURE CALC
ATTENDANCE ACCOUNTING
SIS
GRADE-REPORTING
STUDENT COURSE EVALUATION
HEALTH
SCRAM
REQUIREMENTS FOR GRADUATION
SCHEDULING
YOUTH IN CUSTODY
TRANSCRIPTS
TEACHER CERTIFICATION
INTERNAL FINANCE
VOCATIONAL FINANCIAL REPORTS
REHABILITATION SERVICES
USOE LIBRARIES
TITLE I REPORTING
DISABILITY SERVICES
FINANCIAL MANAGEMENT FOR DISTRICTS
WAREHOUSE INVENTORY
FIXED ASSETS INVENTORY
MICROS SUPPORT
GIS

Information Services

The Information Services Unit provides guidance for development of new data management systems and support for existing systems. The Teacher Information File is now available on-line to all school districts; also, teaching certification and endorsements can be given by subject area via the computer. An on-line data base of student and financial data is being developed for Vocational Education.

Our IBM 3375 disk drives have been replaced by NAS 7380 disk drives which provide faster transaction access and also allow for continued growth. The IBM 4381 central processing unit has been running at 100% capacity much of the time; therefore, an upgrade to the IBM 4381 is being installed to increase speed. This will provide better response time to the school districts and the State Office of Education.

Marketing and User-support Services

The 1985-86 school year was the second production year for the Student Information System (SIS). Extensive inservice training was provided to user districts for proper handling of transactions on the

rapidly expanding telecommunications network. Many school districts converted their student record history to SIS. Planning and analysis occurred relative to the development of additional segments to be added to SIS in the future.

Growth of the SIS occurred in several significant areas. They are as follows:

1. SIS utilization doubled as districts began to make heavy use of its capabilities.
2. Counselors were able to make extensive use of the computerized transcript and graduation analysis.
3. Staff liaison personnel spent considerable time assisting school districts in correlating the Core Curriculum requirements on SIS.
4. The telecommunications network capabilities were enhanced to accommodate the transfer of computer files electronically.

The fiscal system continued to expand with increased application users. With the expansion of the telecommunications network, many districts expanded their microcomputer link-up to the mainframe computer. The Advisory Committee for Fiscal Users continued to help assess the priorities for future development of the overall fiscal system. Major changes to the Retirement System as well as other changes as a result of IRS code adjustments were at the focal point of new development.

SCHOOL/COMMUNITY PLANNING

The mission of the School/Community Planning Section is to provide leadership and support to new and innovative education programs, to serve as liaison to selected educational organizations, and as assigned by the State Superintendent, provide consultation and technical services in such areas as: short and long-range planning; issue management; marketing education; statewide education conferences; community forums on education; resolving conflict; and facilitating educational change. Specifically, the five major assignments are:

1. Implement and manage new and innovative educational reform programs.
2. Administer five assigned grant programs which relate to reform.
3. Provide direction for statewide Community Education processes and programs.
4. Provide consultation and technical services to the agency, its staff, and school districts, as assigned.
5. Provide liaison contact between USOE and those state and national organizations that directly impact Section assignments.

NEW AND INNOVATIVE PROGRAMS

The Section staff facilitates the development, implementation and fiscal management of the following five statewide educational reform programs.

Teacher's Career Ladders

The 1984 Utah State Legislature passed HB 110, "Teachers Career Ladder" and the 1985 Legislature passed SB 14 and 291, which provided additional clarity and direction to the original legislation. Legislative funding for the 1985-86 school year was $30,169,030.

Over 17,000 educators (virtually 100% of the teachers) are participating in Utah's Career Ladder System. The Utah State Board of Education's Career Ladder Standards and Guidelines, cooperatively developed under the direction of the School/Community Planning Staff, provide the necessary direction for local district career ladder plans. Local district plans must be approved by the State Board of Education prior to implementation. For two years, all local education agency plans have been approved by the Board and fully implemented during the school year. A statewide career ladder conference, attended by 400 local education agency career ladder committee members, was held in March to assist local education agencies in the development of their 1986-87 plan applications. The major topics of the conference were improvement of educator evaluation, clarification of career ladder levels, and effective career ladder practices.

School/Community Planning staff worked throughout the year with local education agencies as they evaluated current practices and refined existing career ladder procedures. During the past year, the Utah Education Association and the Utah State Office of Education designed and conducted two independent career ladder surveys in order to assess the acceptance level of Utah's Career Ladder System. Both surveys reported over a 70% acceptance of the Career Ladder System by teachers. During the past year, Utah's Career Ladder System has received substantial national exposure and is now being recognized as a successful statewide career ladder model.

Productivity

During the past six years, the Legislature has funded productivity studies with an increased amount each year. The funds are innovative and developmental in nature and must be used to experiment with new, creative, and novel ways of teaching an increased number of students with a limited number of dollars, while at the same time maintaining or increasing the quality of the education program. Information gleaned from productivity projects is proving valuable in terms of: (1) descriptions of successful productivity models; (2) identification of major results of effective projects; (3) identification of resources needed to replicate projects; and (4) suggestions for the implementation of projects at other sites or locations.

The 1985 State Legislature appropriated $1,200,000 to fund productivity studies. Concept papers and proposals were solicited under

six categories: (1) innovative staffing patterns; (2) proficiency-based programs; (3) scheduling options; (4) improved use of technology; (5) ideas developed through teacher initiative; and (6) programs to improve the efficiency of classified employees. The Section received 51 concept papers involving 31 school districts. After the initial screening process, 30 concept papers were selected for full proposal development. After a careful final review and evaluation of the 30 full proposals, 27 proposals involving a total of 28 local school districts were selected for funding. The School/Community Planning Section provided leadership and technical assistance to the 27 projects throughout the 1985-86 school year. During the 1985-86 school year, two statewide productivity evaluations were conducted under the direction of the Section. James P. Shaver conducted a statewide evaluation of computerized writing instruction (WANDAH), and David D. Williams and Adrian P. Van Mondfrans conducted a statewide evaluation of productivity projects related to the improved use of technology to extend educational programs. The two evaluations will provide information which will help the State Office of Education and local districts make decisions about future directions and uses of the various technologies to increase student performance in education.

The 1986 Legislature appropriated $1,400,000 for further studies and expansion of educational productivity in Utah. These funds will be used during the 1986-87 school year. During the Spring of 1986, concept papers and proposals were again solicited under the six major categories used during the 1985-86 school year. One hundred and four concept papers totaling well over six million dollars were received from Utah school districts. After the initial screening process, 34 concept papers were selected for full proposal development. Of the 34 full proposals, 33 proposals involving a total of 32 local school districts, were selected for funding. These pioneering efforts will help to maximize Utah's scarce educational resources while at the same time, assist Utah's schools in providing more and better education for Utah's students.

Year-Round Schools and Effective Facility Use

The 1985 Legislature appropriated $1,350,000 to assist local districts in their efforts to study or develop year-round and other effective facility use scheduling options for schools. Standards and guidelines for this expanded program were adopted by the State Board of Education on April 4, 1985. All districts were invited to submit applications for the first round of 1985-86 funding. Sixteen districts made application and were subsequently funded for planning and/or development activities involving 51 local schools. Since the beginning of this program in 1985, twenty-seven of Utah's forty school districts have received funding assistance for planning and development activities involving 110 schools. The Section staff has been deeply involved in providing technical assistance, training and grant administration regarding this expanding program. In late August, the Section organized and conducted a major statewide workshop regarding year-round

schools and effective facility use which attracted over 400 participants from all corners of the state.

Incentives for Excellence SB-164

The 1985-86 school year marked the beginning of a very important community involvement program called "Incentives for Excellence." The $250,000 appropriation by the Legislature was designed to promote a strong partnership between public education and private enterprise. The purpose of this appropriation was to provide the impetus to school districts to seek financial support from the greater community in order to enhance educational excellence. This legislative initiative has encouraged the development of education foundations as an important and practical support structure for this kind of community involvement. Prior to the legislation, there were 11 school district education foundations. During the current year, five new foundations were started, and five additional school districts are now in the process of developing foundations.

Districts were required to organize an advisory committee with education, business, private and non-profit organizations represented; submit an overall plan for development; and secure approval from a state-level review committee for the individual projects for which they were seeking matching money. Obtaining the district allocation was contingent upon matching the state monies with private dollars. Twenty-nine of the 40 school districts participated in this program. The $250,000 allocation was matched with $233,677 being generated beyond the $250,000 legislative allocation. During the first year, the funds generated were used to support the core curriculum with a substantial portion of the monies going toward purchase of computer equipment and software; the remaining portions were used to equip science labs, media centers, and provide expanded educational opportunities for students. Through the incentives program, public schools were encouraged to approach the private sector for support for the education of Utah's students, and in doing so, were able to provide increased opportunities for educational excellence.

School Volunteers

The efforts to encourage school volunteer programs during the past year have been three-fold: (1) Technical assistance to district-level coordinators of volunteer programs; (2) Networking with volunteer groups, i.e., Utah Council of Volunteers, Utah Area Association of Directors of Volunteers, Voluntary Action Centers, and the ACTION Agency; and (3) Strengthening working relationships with the Utah School Volunteer Program Association. Training, sharing of information, and development of materials have resulted in increased leadership and capabilities for volunteerism at the school district level, heightened awareness, and increased the number of volunteers in Utah schools.

The 1986 Legislature passed SB-258 requiring the Utah State Office of Education to implement a statewide Volunteer Training Pro-

gram. The legislation provided $100,000 of this program. Specifically, this effort is to result in the establishment of systems and procedures for effective volunteer management at the district and building level, while increasing the number and impact of volunteers in Utah's schools. Staff has been preparing for this major training effort during the last quarter of the 1985-86 school year. In 1986-87, two major statewide volunteer conferences and 25 local or regional two-day effective volunteer management seminars will be conducted in order to help school districts implement the program.

COMMUNITY EDUCATION PROCESS AND PROGRAMS

The Section has been charged with the following community education responsibilities: (1) Public Involvement in Education; (2) School Management; (3) Community Schools; (4) Lifelong Learning; (5) Partnerships in Education; and (6) Building Public Confidence in Education.

Public Involvement in Education

The Utah State Board of Education has identified public involvement in education decision-making as one of its five major education goals for Utah. The involvement of the public in education has for many years been a major priority. The schools belong to the public and the public has the right to be appropriately involved in all decisions which affect the schools. To effectively involve those who should be involved in making an educational decision requires certain attitudes, skills, and commitments on the part of educators and community members. The staff of the Section continues to work with school districts throughout the state in the development of effective public involvement and decision-making systems, as well as providing training, and ongoing technical assistance.

School Management

The Section has taken a leading role in assisting school districts with all phases of planning as districts work to meet the needs of their patrons. The staff has consulted with boards of education, superintendents, principals, district staff, and local community groups in the processes of long-range planning, facilitating educational changes, allocation of resources, and involving the public to increase support for education. Specific techniques used included skills in strategic management, marketing, quality circles, team building, group work skills, communication, problem solving and strategic planning. The Section has responded to requests from districts for Quality Circle Training. During the past year, Ogden School District has trained all of its administrators in the district and has implemented Quality Circles as part of their decision-making/management process. Quality Circles are now operating in the following school districts: Alpine, Jordan, Ogden, Provo, North Sanpete, South Sanpete, Tintic and Tooele. Other types of teacher participatory management systems are operat-

ing in schools in the Weber, Washington, Sevier and Box Elder School Districts.

Community School as a Delivery System

Schools in Utah are classified as community schools to the degree they are open and responsive to their surrounding community. In community schools, people of all ages are involved. They come to the schools as volunteers; as "instructors" to share their special hobbies, skills, or experiences with the children in their enrichment classes; as members of school-community councils or task forces established to help solve problems; as learners; and as participants in recreational activities with family and neighbors. During the 1985-86 fiscal year, over 1,000,000 Utahns participated in some form of educational, social, recreational or community problem-solving activity through their local community schools. The Section is involved in providing training, information and technical assistance for local community school personnel as well as to monitor the progress of local and statewide community school services. Developments in this area are expected to suffer somewhat during the 1986-87 school year due to a 41.2% ($287,972) cut in the state appropriation for this program and the 50% ($10,000) reduction in Utah's annual Community Education grant from the Charles Stewart Mott Foundation.

Lifelong Learning

During the past year, members of the staff have served in a support role to the Consortium for Lifelong Learning. The purpose of this education and service agencies consortium is to secure legislative and agency interest in and support for collaborative efforts to further the concept of lifelong learning. This group focused heavily on building understanding among numerous audiences about lifelong learning through conference and organization presentations. Legislative efforts centered on a bill to encourage cooperation among agencies providing similar services through a financial incentive. This bill was modified into a resolution which was passed by the Legislature. The Consortium played a key role with other organizations in lobbying for restored funding of adult education monies which had been cut by the legislature. The 50% adult allocation cut was restored in a special legislative session.

Partnerships in Education

Educational partnership building, particularly with the business sector, began in 1984. In the Fall of 1985, the Utah School Volunteer Program, in cooperation with the Utah State Office of Education, sponsored a statewide conference on partnerships. Businesses, community organizations and over 130 educators attended the conference to learn about enhancing partnership efforts at the local school level. Staff continues to provide technical assistance to local school districts who are working toward the establishment of educational partnerships.

Public Confidence in Education

During the 1984-85 school year, the Section prepared and submitted a proposal to the C. S. Mott Foundation for building public confidence in education through local partnerships. The proposal resulted in a $20,000 grant to promote partnerships between communities and educational structures which ensure community participation and institutional responsiveness for strengthening the quality of life. The activities sponsored by this special grant included a statewide volunteer conference; a special training institute for community education personnel; a statewide community education conference; a state workshop for community education directors; a state workshop for school superintendents and community education directors; and the preparation and distribution of four issues of a special newsletter (UPDATE) to 600 people within Utah and the National Community Education network.

LIAISON WORK WITH EDUCATION ORGANIZATIONS/GROUPS

A liaison relationship has been established with the following: Utah Education Association and related district teacher education associations; Utah Congress of Parents and Teachers; Utah School Boards Association; Lifelong Learning Committee; Utah Community Education Association; Utah Schools for the Deaf and the Blind; Adult Education Association of Utah; Center for the Deaf and Blind; Utah Society of Superintendents; KUED (Channel 7); Utah Parks and Recreation Association; Utah School Public Relations Association; Small Schools Association; and the Utah School Volunteers Association. This working relationship has included technical assistance in education planning, team building, process facilitation, conflict resolution, strategic planning, planning and co-sponsoring conferences, and collaboratively working on selected education issues. Due to the assignments of the Section, staff has also worked effectively and productively with the: National Career Ladder Clearing House; National Council on Year-Round Education; Council of Chief State School Officers; Charles Stewart Mott Foundation; Education Commission of the States; National Community Education Association; National Association of State Boards of Education; National School Public Relations Association; National School Volunteer Program; Far West Education Laboratory; and the National Congress of Parents and Teachers.

PUBLIC INFORMATION AND RELATIONS SECTION

During FY 86, the Public Information and Relations Section continued to promote public awareness of every aspect of Utah's education reform movement, to expand its efforts aimed at building a positive image of public education in Utah, and to address growing demands

for services by the Board, the Agency, and the school system as a whole.

One highlight was a series of public service announcements developed cooperatively through a contract with a private advertising agency and the State Office of Education. Widely aired on television and radio stations through the state prior to and during the first three weeks of the 1986 Legislative Session, these announcements promoted public awareness about the Core Curriculum, increased graduation requirements, and other major Board reforms. In addition, a ten minute video program was prepared aimed at increasing student and parental understanding about Utah's new Core Curriculum to be mastered by all students.

In Fall, 1985, the Section participated in a multifaceted campaign of the Utah School Public Relations Association (USPRA) to increase awareness about and generate support for Utah's Career Ladder Program. This included the marketing of a theme and logo, preparing success story flyers, producing and making available a 10 minute video program, and creating a position paper endorsed by all of the state's major education organizations. In May, 1986, this effort won USPRA a First Place Marketing Awareness Award from the National School Public Relations Association.

Throughout the year, the Section continued to sustain its diverse ongoing responsibilities as well: preparing and distributing several hundred news releases; providing writing and graphics assistance for numerous special projects and conferences; developing over 100 pieces of marketing and publicity in the form of brochures, posters, programs, and mini-billboard items; producing monthly event calendars and the annual statewide calendar of school district schedules; and providing press clipping service about education.

The PI Section during the year responded to an average of 40 telephone inquiries per day. The director of the section attended all Board meetings and the majority of education-related meetings, gave presentations at workshops, provided technical assistance (writing, design, graphics, marketing strategy plans) to the components of Utah's education family, and prepared speeches and other materials for the State Superintendent and for Board members upon request.

Utah Schools, the official publication of the State Board of Education, was discontinued following the May, 1986, issue. A reorganization of the Unit, with two of the three staff members being given new assignments, was started. Full reorganization of the Unit will be delayed until after the selection and appointment of a new state superintendent. A revised performance plan for the PI Section was prepared to address understaffing predicament and to continue media relations and availability of assistance to districts and educational organizations.

GOVERNMENTAL RELATIONS & SCHOOL LAW SECTION

This Section is charged with responsibility for drafting legislation and policies, coordinating a legislative program for the agency, and for coordination with the Office of the State Attorney General and other units of state and local government. The Section also provides technical assistance to staff of the agency, school districts, other state agencies, and legislative committees.

During the past year, the Section continued the revision of Title 53 of the Utah Code (school laws), and also commenced the task of reviewing and updating the policies of the State Board of Education and State Office of Education to comply with the mandates of the Administrative Rulemaking Act. Section staff also served on committees revising the State Land Law Act and state laws relating to property taxes. During the legislative session, 23 bills supported by the State Board of Education, which were drafted by or with the assistance of the section, were introduced. Eleven of the bills were signed into law by the Governor.

The newly enacted laws included three bills revising parts of Title 53 (to date, 164 sections of the School Code have been repealed, 59 repealed and re-enacted, 48 amended, and 25 enacted; this is the only major portion of the Utah Code that is smaller today than it was in 1983), three improving coordination and delivery of services to handicapped children, three relating to prevention and control of drug abuse, and a major change in the law regarding school fees. School fee regulations were also prepared for State Board action. The new regulations were subsequently approved by the Board.

PART IV
OFFICE OF VOCATIONAL EDUCATION

KENT L. WORTHINGTON
Associate Superintendent

The Office of Vocational Education provides leadership and service for programs throughout grades K-12 and for adults. In the elementary schools, efforts are focused on generating an awareness of the world of work. In middle and junior high schools, specific exploration and hands-on experiences in a broad range of occupational areas is the emphasis. At the senior high level, a core of vocational/technical classes are offered upon which specific job skill training can be based.

Vocational-Technical Education in Utah is a multi-dimensional activity cutting across all educational levels and impacting on individuals from all walks of life and with diverse employment needs. Approximately 80 per cent of the state's population earns its living at jobs requiring vocational training or jobs other than those which demand a university degree. This is expected to remain the same for the foreseeable future. Utah's economic growth is directly linked to strong vocational programs.

During the past year, three major missions served as a catalyst for the Office of Vocational Education: (1) building a coordinated ongoing instructional program extending throughout the system from kindergarten through the post-secondary level; (2) becoming ever more responsive to the evolving job training needs of business and industry; (3) and developing and refining our services to displaced adult workers who need retraining and finding the time and resources to do it.

BUSINESS AND INDUSTRY TRAINING SECTION

Area Vocational Centers

Fiscal year 1986 was characterized by explosive enrollment and employer demands for services, simultaneous budget reductions, increased student waiting lists, and orderly facilities development to meet student/employer demands.

Actual growth at Bridgerland AVC, Ogden-Weber AVC and Davis AVC has far surpassed expected student growth and employer demands for services. The five Utah Area Vocational Centers headcount enrollments exceeded 13,000 during the year, including approximately 2,000 students enrolled in custom fit training for specific employers. Projected enrollments at Bridgerland AVC more than doubled FY 1985 figures—from 400 FTE to nearly 850 FTE, while headcounts nearly tripled from an expected 1,200 to 3,300; secondary enrollments increased three fold with Logan School District sending all vocational students to the AVC except those enrolled in business education.

The total number of students served at Ogden-Weber AVC grew 19 percent from 2,683 in FY 1985 to 3,193 in FY 1986; FTE enrollments were up 34 percent to 705; job placements increased 35 percent from the previous year to 1,421; and for the first time in the history of Ogden-Weber, the average daily enrollment exceeded 1,000 students.

Davis AVC headcount enrollments surpassed an eight year average growth of 24 percent with a 42 percent increase to 2,892 adult and secondary students. FTE surpassed an eight year average growth of 21 percent with a 65 percent increase to 713 FTE. Secondary enrollments are also increasing steadily with the low at 11 percent, the high at 36 percent, with the average at approximately 25 percent.

Custom Fit contracts with local employers have also increased significantly. The number of Custom Fit contracts has grown 65 percent to 61 between FY 1985 and FY 1986 at the five Utah Area Vocational Centers. Since several small businesses may be clustered into one contract, the number of employers provided Custom Fit services by the Centers during FY 1986 exceeded 100. Projections indicate Custom Fit services will grow from 70 to 80 percent over the next three years.

Construction continued throughout the year on Bridgerland AVC's automotive, electronics, and autobody training areas; Ogden-Weber AVC's campus site development of roads, walkways and underground utilities; and Davis AVC's electronics, drafting, building maintenance facilities as well as funds to remodel the present autobody facility. In addition, Davis AVC made its first payment on the 40 acres of land adjacent to the Center being purchased from Davis School District.

Key issues the Utah Area Vocational Centers will pursue during the coming year are:

- Providing needed services with declining resources, while experiencing continued enrollment pressures and competition for jobs.

The FY 1986 area vocational center budgets were reduced $577,379 or 5.7 percent overall during the year. Further budget reductions may be required during FY 1987.

- Continuing to expand opportunities for high school students to complete vocational training as part of their high school programs enabling them to obtain employment after graduation.
- Continuing to develop the financial support to sustain the expertise required to better design and implement custom fit training programs.
- Developing methods for effectively serving specific target populations and placing students in jobs relating to training to effectively impact the state's employment and economic development.

Custom For-Industry-Training
(Custom-Fit)

Changes in staffing pattern for Custom Fit were initiated in the State Office to provide for federal accountability for the expenditure of funds. One of two part-time professional staff was reassigned to other assignments and a technician was assigned to monitor projects and maintain fiscal and statistical records. The staff recognized midway through the year that the criteria established for the expenditure of the $1,000,000 State Critical Industries funds (new or expanding jobs) was too restrictive for the expenditure of the Federal JTPA funds ($600,000). Those funds are designed by law to fill the voids between education and work to assist disadvantaged populations to become employed. The economy is in a slump, and a greater basic skills effort is needed to help prepare the disadvantaged to compete for jobs than "Critical Industries" regulations will permit. Meetings have been held with the Job Training Coordinating Council (JTCC) that is the state council through which responsibility for the JTPA fund is assigned. The council was not supportive of allowing greater flexibility.

Meanwhile, the nine Private Industry Councils (PICs) that serve in multi-county regions of the state, which are sub-councils under the state JTCC, have passed to have the JTPA 8 per cent fund flow directly to them rather than through the State Office of Education and Custom Fit Committee. The resolution of the issue will hopefully be forthcoming in the next year.

Even with these concerns, great impact was made to bolster the economy. Following are some of the results:

- Major new companies served:
  - Kimberly Clark—Ogden
  - Mesa Inc.—Clearfield
  - Heritage Stove—Clearfield
  - All American Gourmet—Clearfield
  - Weslo—Logan
  - Delano Mushrooms—Sulphurdale
- Number of new and expanding business served FY 1986: 77
- Number of JTPA placed FY 1986: 378

- Number of CI placed FY 1986: 609
- Average cost per JTPA trainee: $1,100
- Average cost per CI trainee: $873
- Average wage paid workers: $5.50

Education Equity In Vocational Education

The responsibility for ensuring educational equity in vocational education provides an opportunity for state and local personnel to work cooperatively to prevent discrimination and promote equity at each stage of the educational process. This philosophy serves as the basis for making decisions regarding the types of activities and materials that have been developed to assist vocational educators to provide an educational environment that encourages students to make career decisions based on each student's unique interests, abilities, and values without restriction because of gender.

Gender Equity

In addition to continuing efforts to reduce gender bias and gender stereotyping in vocational education, gender equity programs were expanded to include activities designed to assist girls and women, aged 14 through 25, to be able to support themselves and their families.

Several significant projects were carried out during the past year.

- Gender equity conferences in five regions of the state.
- Field testing of an equity education module for teacher educators and student teachers.
- PTA State Council adoption of an Equity Resolution.
- Project VOTE (Vocational Opportunity Through Equity) materials were used in workshops conducted by the PTA in 18 regions of the state.
- Ogden, Weber, and Morgan Region developed a video tape on non-traditional occupations in vocational education for statewide dissemination.
- Utah Tech College/Provo sponsored a math, science workshop for girls and women.
- Two teen parent model projects were funded to develop strategies to assist pregnant adolescents to become economically self-sufficient.
- Davis District Teen Parent Program developed a video tape showing strategies for training pregnant adolescents for jobs.
- A model program to infuse gender equity concepts with the vocational guidance and counseling programs was developed in Nebo District.

Single Parent or Displaced Homemaker

Six regional projects were funded to serve single parents and homemakers. Services included pre-employment, skills training, employment, placement, and followup, and support services (child care and transportation).

The six programs served a total of 984 clients. A statewide evaluation was conducted to provide service providers and the Utah State Office of Education with information to design programs that will meet the needs of the Single Parents or Homemakers served in these programs. The evaluation data indicates that 76 per cent of the clients served were either employed or enrolled in a vocational program.

During 1986 the State Legislature passed the Utah Displaced Homemaker Act that will be implemented the coming year. These funds will allow for additional services for displaced homemakers during FY 87.

The Utah State Office of Vocational Education initiated a Governor's Award, to recognize an Outstanding Displaced Homemaker at the Vocational Excellence Award Program.

Federal Vocational Funds

The Carl D. Perkins Vocational Education Act of 1984 (P.L. 98-524) completed its second year during 1985-86.

This Act targeted federal vocational funds to: (1) expand, improve, modernize, and develop quality programs for existing and future work force; (2) assure access of all persons to vocational programs; (3) promote greater cooperation between public agencies and the private sector in preparing individuals for employment; (4) improve academic foundations to facilitate application of newer technologies in vocational goals or employment; (5) provide services to train, retrain, and upgrade employed and unemployed workers with new skills; (6) assist the most economically depressed areas of the state to raise employment and occupational competencies of citizens; (7) assist the state to utilize a full range of supportive services; and (8) improve the effectiveness of consumer and homemaking and to reduce sex-role stereotypes on occupations.

To accomplish these purposes the Utah State Office of Vocational Education received approximately 5.9 million dollars to: (1) administer statewide vocational efforts; (2) provide services and activities to meet needs of special groups; and (3) facilitate improvement, innovation and expansion of vocational programs.

Funds, distributed to school districts, area vocational centers, post-secondary institutions, and private agencies, were allocated via formula, competitive grants, and direct grants.

Office of Civil Rights

Desk audits were conducted on eleven LEAs and on-site compliance reviews were conducted in four LEAs. The Utah Annual Report documenting the Civil Rights activities carried out during 1986 was submitted on June 30, 1986 to the United States Office of Education, Office for Civil Rights.

SECONDARY AND POST-SECONDARY PROGRAMS SECTION

Trade, Industrial, and Technical Programs

Trade, Industrial & Technical Education Programs develop manipulative skills, technical knowledge, safety judgments, trade ethics, leadership abilities, and related occupational information which prepare individuals for initial employment, or upgrade, or retrain out-of-school youth and adult workers in these occupations.

The programs are located in the high schools, area vocational centers, and postsecondary institutions across the state and are recognized as the largest of the content areas in vocational education.

The growth and development of these programs are based on employment projections and needs of modern high technology industries in Utah. The following is a sampling of the innovative programs/projects developed during the last year:

INNOVATIVE SECONDARY PROGRAMS/PROJECTS

Programs/Project	Region—Local Agency	
Computer Aided Drafting (CAD)	Mt. Lands	Alpine District Nebo District Provo District North Summit District South Summit District Park City District
Competency Based Auto Mechanics and Electronics Articulation Projects	Bridgerland	Cache District Logan District Box Elder District

CAREER EDUCATION AND VOCATIONAL GUIDANCE

The Office of Vocational Education continued to make progress in achieving its goal to establish one comprehensive vocational assessment (intake assessment) center in each region of the state. Eleven centers are now in operation in all but one region of the state. These centers will serve high school students and adults, including displaced homemakers, laid-off employees, disadvantaged and handicapped individuals.

Educational reform efforts resulted in the establishment of vocational core curriculum requirements for students at both the middle school/junior high school, and the high school level. The new high school course will require students to demonstrate they know and can apply career decision-making skills and the skills necessary to seek, secure, and keep a job.

The junior high/middle school vocational course titled Technology, Life and Careers (TLC) has been designed to include a two-week career guidance unit. In addition, guidance concepts have been imbedded in all of the course content. The TLC program will give students the opportunity to explore a wide range of career opportunities related to the vocational areas of Business, Marketing, Industrial Arts, Agriculture, Home Economics and Health Occupations.

The statewide Guidance Information System (GIS) serves 70 high school, area center and college sites. This computer-assisted program provides students and adults with up-to-date occupational information and information about major Utah employers. Over 150 educators were trained to use the system during the year. Additionally, a new Utah Vocational School file has been added to the program and the Employer file has been expanded from 300 to 650 of the state's largest employers.

HOME ECONOMICS

The following were among the many activities and events of Fiscal 1986:

July, 1985	• National FHA Convention in Salt Lake Headquarters at the Marriott Hotel; Utah hosted 5000 at the Mormon Tabernacle to a patriotic evening of music by the Mormon Youth Symphony and Choir.
August	• Youth Leadership Conference at Snow College. • Textbook Adoption Committee Meeting.
September	• Consumer & Home Economics Task Force Meeting with Business & Industry held at the Governor's Mansion. • FHA Executive Board Meeting at BYU. • 5 County Home Ec Teacher's In-service—SUSC.
October	• FHA Peer Education Meeting with March of Dimes—attendance, 300. • Consumer & Home Economics Task Force Meeting, USOE.
November	• FHA Cluster Meeting—Albuquerque, New Mexico. • Home Ec Teacher's In-service USU—4 districts: Cache, Box Elder & Rich—attendance, 38. • High School Home Ec Teachers & Business & Industry Meeting—ZCMI Headquarters—attendance, 150.
December	• Homemaker Home Health Curriculum Meeting—Davis District—all Social Service Agencies represented.
January, 1986	• Home Ec Teacher's In-service on Societal Needs & Lab Management with 4 counties—attendance, 22. • Consumer & Home Ec Task Force Meeting, USOE. • FHA Executive Council Planning Meeting.
February	• Eating Disorders Conference—Highland High School —Home Ec Teachers and FHA Officers—attendance 500. • Core Planning Meeting—Granite District.

March
- Mid-winter Conference, Vernal—In-service of Home Ec Teachers.
- UHEA Meeting and Workshop of Home Ec Teachers —St. George.
- FHA Executive Meeting—USOE—Planning State Convention.
- Planning Meeting for Virginia Knauer's United States Office of Consumer Affairs Workshop in Salt Lake.

April
- Consumer & Home Ec Task Force Meeting planning Vocational Educational Conference.
- FHA State Convention—Park City, Utah—attendance, 800.
- Sterling Scholar finals: St. George, Park City, Centerfield and Salt Lake.
- United States Office of Consumer Affairs Virginia Knauer Workshop—Home Economics Teachers and students at Taylorsville High School—attendance, 400.

May
- Competency Testing Workshop—UTC/Salt Lake for teachers and Business and Industry in Child Development.
- Consumer & Home Ec Task Force Meeting, USOE.

June
- FHA, Consumer & Home Ec Task Force and March of Dimes Workshop for Planning Healthy Babies Healthy Life Styles.
- Vocational Conference—UTC/Orem Campus—attendance, 400.
- Home Economics Teachers' Clothing Workshop.

VOCATIONAL AGRICULTURE

Utah's farm income exceeded one-half billion dollars in 1985, with the multiplier effect of five fold. This means $2.5 billion to the state's economy. Milk accounted for 27.5 percent of the income, with cattle being second at 26 percent. Box Elder County is the leading county in irrigated acres, followed by Millard and Utah Counties.

Vocational agriculture instruction is carried out in 59 high schools, along with Young Farmer programs. The Future Farmers of America (FFA) membership in Utah exceeds 3,200, with 500,000 members nationwide. Supervised occupational experience, classroom and field work, and the FFA blend well in making a very successful instructional program.

One and two-year technical programs exist at Utah State University in Dairy Herd Management, Ornamental Horticulture, Meat Science, and Agricultural Machinery. Additional two-year programs are offered at Snow College and Southern Utah State College.

New Agriculture I and II curriculum guides have been developed and distributed to LEAs. The impact of changing technology in agriculture is evident with computers on farm equipment, as well as being

utilized by vocational agriculture teachers and farmers to assist in management decisions.

The computer-assisted farm and ranch management program was expanded with the addition of a full-time position through the Bridgerland Area Vocational Center and a new program at the Uintah Basin Area Vocational Center. Snow College will begin a new Farm/Ranch Management Program in the Fall of 1987.

The Utah Young Farmers Educational Association plans to make a bid to host the 1988 National Young Farmer Institute during the annual institute in Indianapolis, Indiana the first week in December.

Trudy Phillips, past State FFA Treasurer, from Springville, will be a candidate for a national FFA Office. Ralph Perkins, of the Panguitch Chapter, was the regional winner in Diversified Livestock, and Kirk Harris, of Richfield, was the regional winner in Turf and Landscape Management. They will compete for an all-expenses-paid 12-day trip to Europe, and $750 first prize cash award during the National Convention in Kansas City, Missouri.

Agriculture continues to play a key role in the economy of Utah.

VOCATIONAL LEADERSHIP ORGANIZATIONS

Vocational Leadership Organizations function as an integral part of the state's vocational programs with emphasis on leadership and skill development. Participation provides for the enhancement of employment opportunities, advancement, and job stability.

Over 12,000 Utah high school and postsecondary students were members of Utah's vocational leadership organizations last year. These members had the opportunity to participate in leadership training conferences, community service projects, scholarship programs, and state, regional, national, and international conferences. All organizations conduct competitive events where students demonstrate hands-on vocational skills and/or personal or leadership skills. Utah students excel at all national competitive events.

The Vocational Leadership Organizations' specialist coordinates the activities of the 13 organizations. Each organization operates under the direction of an advisory board with a state director conducting member activities.

A coordinating committee comprised of a representative of the Board of Regents, a postsecondary vocational director, and five district vocational directors act in an advisory capacity to administrators of the vocational leadership organizations at the State Office of Education. This board provides valuable input and assistance.

In keeping with State Board of Education guidelines, all organizations have made an effort to reduce student out-of-school time. Activities, insofar as possible, have been moved to after-school hours, weekends, and summers. Also, conferences, meetings, and activities are being held at centralized geographical locations.

The benefits of Vocational Leadership Organizations, as well as

vocational education itself, have been promoted through the use of television, radio, and newspapers. Two brochures have been developed specifically to provide information regarding Vocational Leadership Organizations in Utah.

Utah has the distinction of being the home of an FHA and a Delta Epsilon Chi national officer. The Western Regional DECA/Delta Epsilon Chi Leadership Conference will be held in Salt Lake City this year. We are also honored to have had Salt Lake City selected as the site of the National DECA/Delta Epsilon Chi Career Development Conference which will be held in 1988.

Through competition held at the State Vocational Leadership Organization Conferences throughout the year, 20 Vocational Excellence winners were selected and presented with scholarships and cash awards by Governor Bangerter.

The 13 vocational leadership organizations presently functioning in the state are:

Vocational Programs	Secondary	Post Secondary
Industrial Arts	AIASA	
Marketing	DECA	EX
Business Education	FBLA	¢BΔ
Agriculture	FFA	YOUNG FARMERS
Home Economics	FHA/HERO	UTAH HOMEMAKERS
Health Occupations	HOSA	HOSA
Trade and Industry	VICA	VICA

MARKETING EDUCATION

Marketing Education provides instruction designed to prepare students for work and further study in the fields of apparel and accessories, business and personal services, entrepreneurship, financial services, food marketing, retailing, general marketing, hospitality and recreation, real estate, and vehicles and petroleum. The program is a cooperative approach using both the facilities of the school and the business resources of the community. Instruction in the school is supplemental by supervised occupational experiences through the laboratory or project methods planned and conducted by the school.

Employment in the Marketing and Distributive Education occupations in Utah reached 20,000 jobs, with an annual need for 13,000 employees.

Marketing curriculum is being modified to follow a competency-based approach making it feasible to articulate from school to school, or secondary to post-secondary. Thorough research was completed and we have become a member of an Interstate Distributive Education Curriculum Consortium. Materials are available for learning activities packets, training plans, competency-based tests in areas such as the following: (1) Human Relationships, (2) Apparel and Accessories, (3) Economics and Marketing, (4) Selling, (5) Mathematics, (6) Tourism, (7) Management and (8) CORE Curriculum, etc.

processing, clerk typists, secretary/stenographer, entrepreneurship, and office management/supervision.

The challenge of business education is to provide trained workers for business and industry by providing competency-based testing and certification for all business programs. Competency performance tests are currently being conducted for business education students throughout the state in data processing, accounting, and word processing. As new areas of technology emerge, new skill competencies needed by business and industry will be identified and competency tests will be developed.

Members of the Utah State Advisory Council for Business Education support the business program in numerous ways. They serve as classroom speakers, judge special skill competitions, provide the direction for the certification development, and provide workers from industry who assist with validation of the business competencies.

Business education is part of a major endeavor to provide junior high/middle schools with a vocational core exploration program. Hands-on experiences provide young students with an opportunity to explore new technology in business. High school business students are also participating in the high school pilot program for the core curriculum.

The annual June Vocation Conference provides the opportunity to update business teachers with the latest technology. Excellent teachers are given an opportunity to share curriculum and teaching ideas.

PART V
OFFICE OF CURRICULUM AND INSTRUCTION

BRUCE T. GRIFFIN
Associate Superintendent

During 1985-86, the Office of Curriculum and Instruction continued to function as a major catalyst for the momentum of Utah's educational reform program, facilitating the improvement of efficiency and effectiveness in our school system and helping to implement the key changes that will assure educational excellence in Utah's future.

FIELD TESTING THE CORE CURRICULUM

The 1985-86 school year was the field trial year for the Elementary and Secondary Core Curriculum Standards for Utah public schools, a highlight of the comprehensive State Office and district core study process. During this time, input was gathered from 11,600 teachers and administrators, plus 250 others including curriculum directors, textbook and material leaders, and others. Thirty-six of Utah's 40 school districts were actively involved.

The core document defines standards and supporting objectives for all grade levels and all required subjects. The review and revision process posed three questions: (1) Are the standards and objectives really core? (2) Are the standards and objectives at the right level? and (3) Can most students learn the standards and objectives? Responding teachers were selected by subject field on recommendation of their district administrators. Results were tabulated and refinements considered wherever concern of five per cent or more was expressed.

Open dialogue was conducted at a meeting in Salt Lake City in June, 1986, and in September at seven regional sites throughout the state. An analysis of the gathered evaluation data and suggested refinements was submitted to the State Board of Education in September. Final Board approval came in November. Distribution of the official Core Curriculum Standards document will occur in January, 1987, with its full impact to be felt in the schools in fall, 1987.

IMPROVING STUDENT ACADEMIC LEARNING

Outcome-Based Education (OBE) and Mastery Learning continued to enhance student academic achievement based on the concept that most all students can learn, given sufficient time and proper instruction. Legislative funding encouraged 16 districts to carry out OBE projects. The Utah Institute for School Improvement, a 10-week training program, attracted over 1,600 participants. Sevier District consolidated all its resources for student learning outcomes. In only three months, sixth graders at Book Cliff Elementary raised their average test scores by 2.14 years.

Five schools from Logan, Jordan, Provo, and Granite became finalists in fall, 1985, as Utah's entries in the U.S. Department of Education's first Elementary School Recognition Program. Chosen in spring, 1986, as Utah's winners were Altara Elementary in Jordan and Hillcrest Elementary in Logan. Emery, Grand, and Sevier districts were honored for progress toward excellence at the 1986 Rural Schools Conference at Brian Head. Seventy-four elementary and 58 middle/junior high schools earned accreditation by the State Board of Education during the year.

Thirty Utah school districts hosted 245 foreign students representing 28 foreign countries in approved student exchange programs. The Textbook Library continued to serve the needs of teachers and other educators throughout the state. Textbooks continued to be provided to Utah students at a cost of half the national average estimated expenditure per pupil.

PRINCIPALS ACADEMY, TEACHER REFORMS

In its second year, the Utah Principals Academy continued to strengthen the role of the principal as instructional leader, provide inservice training to administrators, and serve as a resource center to them for the dissemination of ideas and practices. During 85-86, 42 principals participated in the Fellows Program, 17 seminars were conducted, innovative cluster programs were initiated in Provo and Nebo districts, and Utah's first workshop specifically designed for assistant principals drew an attendance of 130.

A total of 29 local school districts nominated applicants for Utah's Career Teaching Scholarship Program. Twenty-two new scholarships were awarded. Among those both new and continuing, 31 were to the University of Utah and 32 to Utah State University. Twenty-five per

cent went to math majors, 11 per cent to science majors, and 16 per cent in Special Education.

In teacher certification reform, terminology has been changed from Basic Professional to Basic and from Professional to Standard. The Basic certification period for all new professional personnel is two years; professional competence is the criterion for permanent or Standard certification. Subject specific certification is required for secondary and most middle school teachers.

TECHNOLOGY EXPANDS INSTRUCTIONAL DELIVERY

During FY 86, instructional technology continued to open new vistas for learning. A collaborative effort by IBM, Bonneville International Corporation, and the State Office of Education successfully taught beginning Spanish through satellite delivery and computer reinforcement. The Spanish program, which involved 23 sites and 900 students in this pilot year, is attracting nationwide regard as an exemplary model of distance-accelerated learning.

During 85-86, Education Network (EDNET), a subsidiary of the State Education Technology Operation Center, began to provide two way audio/video service via microwave linking studios at Channel 7, Utah Technical College in Orem, Snow College, Southern Utah State College, Uintah Basin Area Vocational Center, Vernal City Offices, and Manila High School. Other links will be added in the future.

The Central Utah Educational Service Center is expanding its network to six high schools, enabling teachers to televise classes using the EDNET system for concurrent enrollment credit. Another potential benefit is Channel 9, a former public broadcasting station in Ogden to be reactivated at the University of Utah beginning in January, 1987. The State Office of Education has been invited to offer programming input. This opportunity offers an additional cost-effective and versatile resource for statewide instruction via television.

MANAGEMENT SYSTEMS AND NETWORKING

The Curriculum and Instruction Division has developed a computerized certification management system that provides a common data base of the certification records of all teachers and other staff holding Utah credentials. This makes possible for the first time a unified state-wide certification file jointly maintained by the State Office of Education and local school districts. In addition to information on individual teachers, accumulative staff report data are available on both a district and state-wide basis.

Working with Murray and Uintah School Districts, the Office of Curriculum and Instruction has created an integrated school management system that not only keeps track of such administrative items as attendance and school lunch, but also supports the curriculum by providing a system based on mastery learning that identifies standards and objectives, monitors a student's progress, prints report cards, measures student achievement through a random access weighted

PART V
OFFICE OF CURRICULUM AND INSTRUCTION

test bank, and permits the use of CAI (Computer Assisted Instruction) programs and Media Center inventory and circulation programs all on the same equipment. Through the use of this system considerable student and teacher creativity has been stimulated and a practical method of applying the core curriculum has been provided.

Nearly two thousand educators and school offices across the state have been networked together through the use of microcomputers, telephone lines and the State Education Agency's mainframe computer. This has made possible the development of an electronic mail (EMAIL) system by which these persons and offices are now communicating on a daily basis and provided immediate access to data bases covering such areas as textbook adoptions, educational computer software evaluations, in-service activities, and exemplary programs. The EMAIL system alone has resulted in a considerable improvement in mail response time and the reduction of some secretarial services.

PROGRESS IN ADULT EDUCATION SERVICES

The Adult Education Services Unit (AESU) is continuing to embrace the growing field of education and training for adults outside that offered by traditional post-secondary institutions. Specifically, AESU organizes and implements programs in English As a Second Language (ESL); Adult Basic Education; General Education Development; Adult High School Completion; and General Adult Education and Lifelong Learning for Adults.

During the past year, the AESU implemented a competency-based adult basic high school curriculum for Utah. Criteria for the funding of local programs are increasingly being tied to clock hours of attendance and aggregate units of credit issued through local mastery testing and instruction. Several local programs are establishing mastery-based learning centers where students can learn at their own pace and in their own style.

AESU is also providing leadership for a state and national literacy initiative. In 85-86, it established a Utah literacy and ESL coalition; published a directory of Utah's literacy programs and all teachers of adults; and promoted Project Plus, a campaign to promote public awareness of literacy achievements and recruit needy students and volunteers to assist them.

In addition, AESU is identifying instructional units and competencies for teaching the approved Core Curriculum with local district and corporate private support; creating related placement, diagnostic, and achievement/assessment item banks for each Core subject; and developing a computer program for adult student education plans keyed to subject mastery and individual learning preferences.

CHAPTER I AND MIGRANT PROGRAMS

In fiscal year 86, 266 Utah schools provided supplementary Chapter I instructional services to over 23,000 students. Utah received

over $12 million in Chapter I funds to conduct programs in local school districts, special education institutions, institutions for neglected and delinquent youngsters, and for children of migrant farm workers. Allocations ranged from $1,586,998 for Granite to $10,580 for Piute. In 85-86, over 900 full-time staff including teachers, teacher aids, and tutors were directly engaged in the delivery of Chapter I instruction in the state.

The quality of Chapter I instruction in Utah is high. In April, 1986, four Chapter I projects were selected as unusually successful under the U.S. Department of Education's Initiative to Improve the Education of Disadvantaged Children. Commended for outstanding effectiveness were Salt Lake's Chapter I Laboratory Program of Reading and Math 2-6; Jordan's Chapter I Project in Reading K-3; Granite's Chapter I Prime Program of Reading and Math; and Ogden's Millcreek Youth Center Chapter I Program for Delinquent Students.

During the 85-86 year, Uintah District joined the 10 other Migrant Education programs which served the needs of approximately 950 migrants of all ages from Cedar City in the south to Logan in the north. Among them were 190 children ages 0-5 and 174 secondary students grades 8-12.

A publication entitled "Portraits of Success" describing migrant students who have made outstanding accomplishments was produced. The state recruiter provided inservice training to local district personnel. The North Sanpete Migrant Program was honored as exemplary by the U.S. Department of Education. Health screenings and meals continued to be provided through coordination with the State Department of Health and the Rural Development Council.

MAINSTREAMING AND TRANSITION IN SPECIAL EDUCATION

During 85-86, Special Education served the needs of 50,450 students of which 39,021 were in resource and 11,429 in self-contained settings. The Early Intervention Bill passed by the 1986 Legislature mandating services to handicapped children ages three to five was strengthened by 1986 amendments to Public Law 94-142 Education of the Handicapped Act providing specifically for handicapped infants and toddlers ages 0-2 and three-to-five-year-old pre-schoolers.

In October, 1985, an innovative Mainstreaming Project was launched to facilitate instruction of at least 85 per cent of the state's mild-to-moderately handicapped students in regular classroom settings in the public schools. A total of eight pilot elementary schools in Grand, Garfield, Juab, Morgan, Provo, and Granite districts participated in the project, which involved 185 teachers and impacted over 4,500 youngsters. Success will be verified through ongoing curriculum-based assessment.

The Special Education Section also played a more active role in planning, developing, and implementing a transition program for handicapped students. The goal of transition is meaningful, paid employment and successful community functioning for young adults

with disabilities through coordination with educational, family, and state agency resources.

Fiscal 86 was the initial year of the new Level System for the funding of Special Education based on actual delivery of services to students. The participation of all school districts in the SCRAM component of the Student Information System or an appropriate parallel data base is making possible a single data collection system.

These two accomplishments represent a major breakthrough from the old system, based upon categorical labeling only, by enforcing a more equitable distribution of the $56 million in state Special Education money on the basis of verified intensity of service to the handicapped child.

BUILDING PROGRESSIVE SYSTEMWIDE LINKAGES

During 1985-86, over 6,000 Utah students took Advanced Placement exams with a passing rate of 67 per cent (4,000). Concurrent enrollment, a program in which students earn actual college credit while still in high school, was added to Utah's Special Purpose Optional Programs as an effective answer to rising enrollment, productive use of services, and increasing costs. Participation in concurrent enrollment and in Advanced Placement programs is expected to increase in the future.

FY 86 was also the initial implementation year of Utah's Early Childhood State Development Grant mandating comprehensive interagency services for handicapped pre-school children ages 0-5. To facilitate its success, a task force was organized, a needs assessment was conducted, and goals for parent/family support, community awareness, and personnel development were established.

Such programs to build interactive bridges at both ends of the spectrum of Utah's public school system are typical of current efforts to seek innovative ways to conserve costs, decrease duplication of services, and assure the high quality instruction that makes each school year as productive as possible for every individual student.

Note: This calculation of average contract salaries does not include career ladder compensation. The following certificated personnel are eligible to receive career ladder funds: classroom teachers, counselors, media specialists, psychologists and social workers. The estimated state average additional career ladder compensation for these certificated positions per FTE is $1,695 for 1985-86.

UTAH STATE OFFICE OF EDUCATION

CHART II
ASSESSED VALUATION PER AVERAGE DAILY MEMBERSHIP BY SCHOOL DISTRICT 1985-86

This chart illustrates the range of assessed valuations per student in average daily membership for the 40 school districts in Utah. The districts have been ranked from high to low and show the great differences that exist between districts in their valuations. Such marked differences in assessed valuation point up the importance of equalizing educational opportunities for all children in the state. The State-Supported Minimum School Program has greatly assisted in making available equal educational opportunities in all school districts.
